Arc Standard

This section details the process of building the stand and the correct installation of Arc Stand.

Cautions & Warnings

Cautions & Warnings

Ensure you have fully read, understood and comply with the cautions & warnings in the Arc Users Manual supplied with the oven.

—
All four of the casters should always be locked unless you are moving the oven.

—
Never attempt to move the oven when it is still warm, wait for it to fully cool first.

—
When moving the oven on the stand always push/pull from the stand and not the oven.

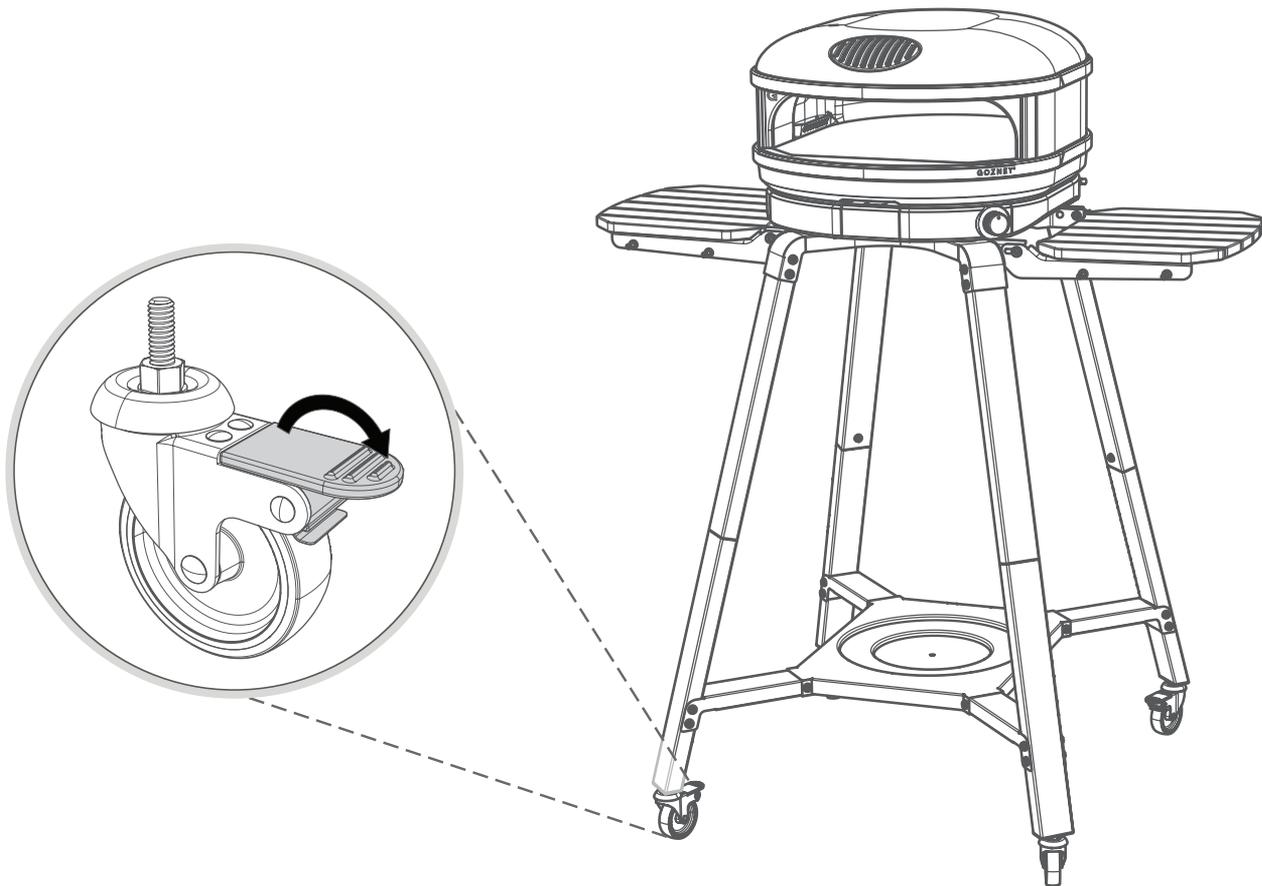

—
Remove anything loose from the stand and its shelves before moving it.

Placing hot items from the oven onto the wooden shelves may damage them, use appropriate protection to avoid damage.

—
Exposing the wood to direct sunlight and rain for extended periods can cause the protective layers to break down. To prevent this follow the below steps:

1. Store the unit out of sunlight when not in use.
2. Dry the wood with a soft cloth after exposure to moisture.
3. Apply an outdoor furniture oil treatment every 8 weeks.

Gas Oven

Always disconnect the oven from the gas supply before moving the oven.

—

The casters should always be locked when the oven is connected to a gas supply, even if the oven isn't in use.

—

Ensure you're using a Gozney supplied gas connector or one that complies with the Standard for movable gas appliances (ANSI Z21.69 / CSA 6.16), and a quick-disconnect device that complies with the relevant Standards (ANSI Z21.41 / CSA 6.9).

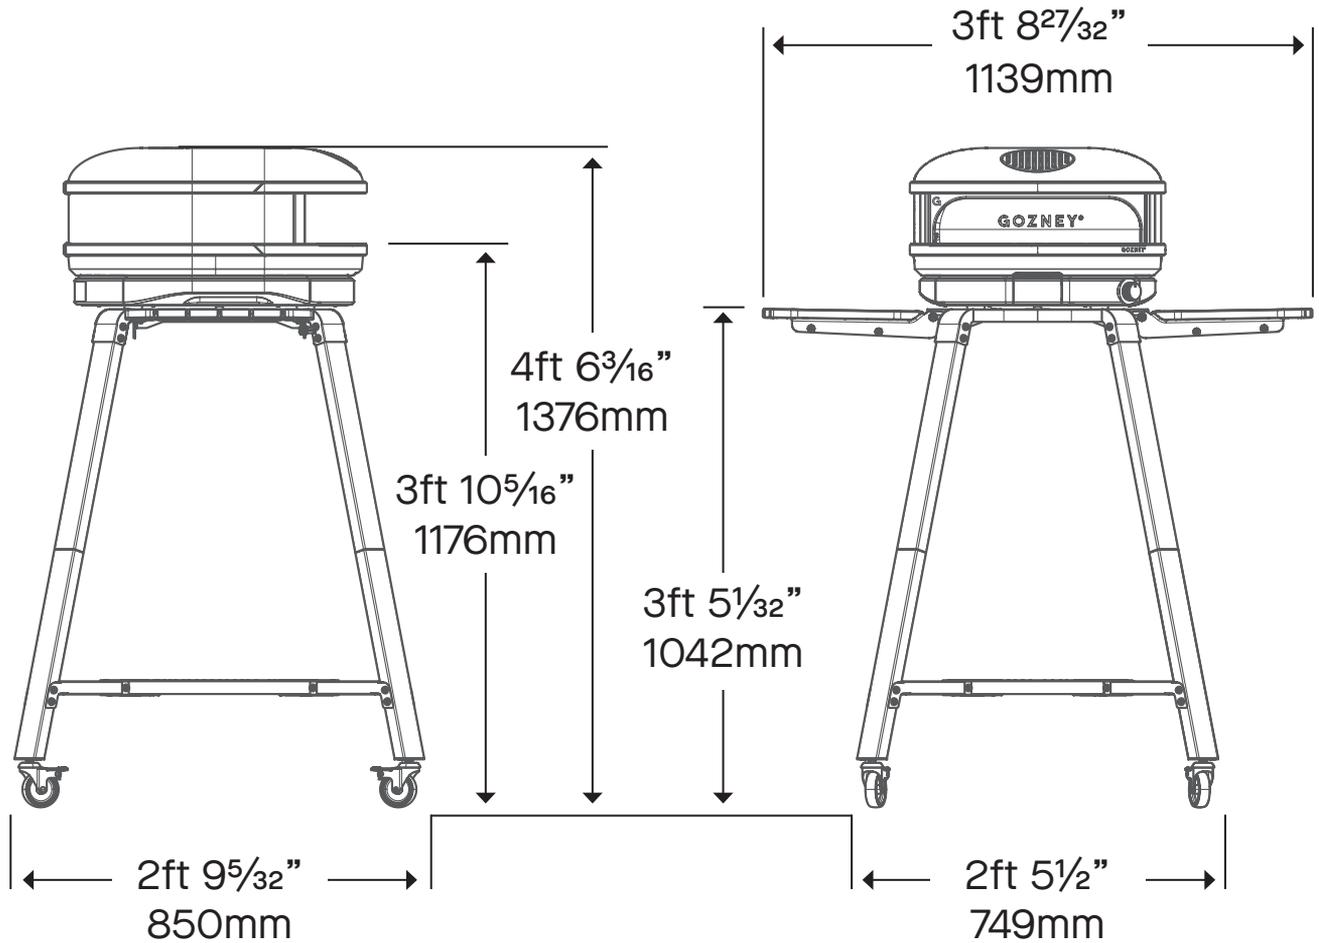

The gas connector and the quick disconnect device or its associated piping should never be used to limit the movement of the appliance.

This section details the process of building the stand and the correct installation of Arc Stand.

Building & Installation

Build Manual

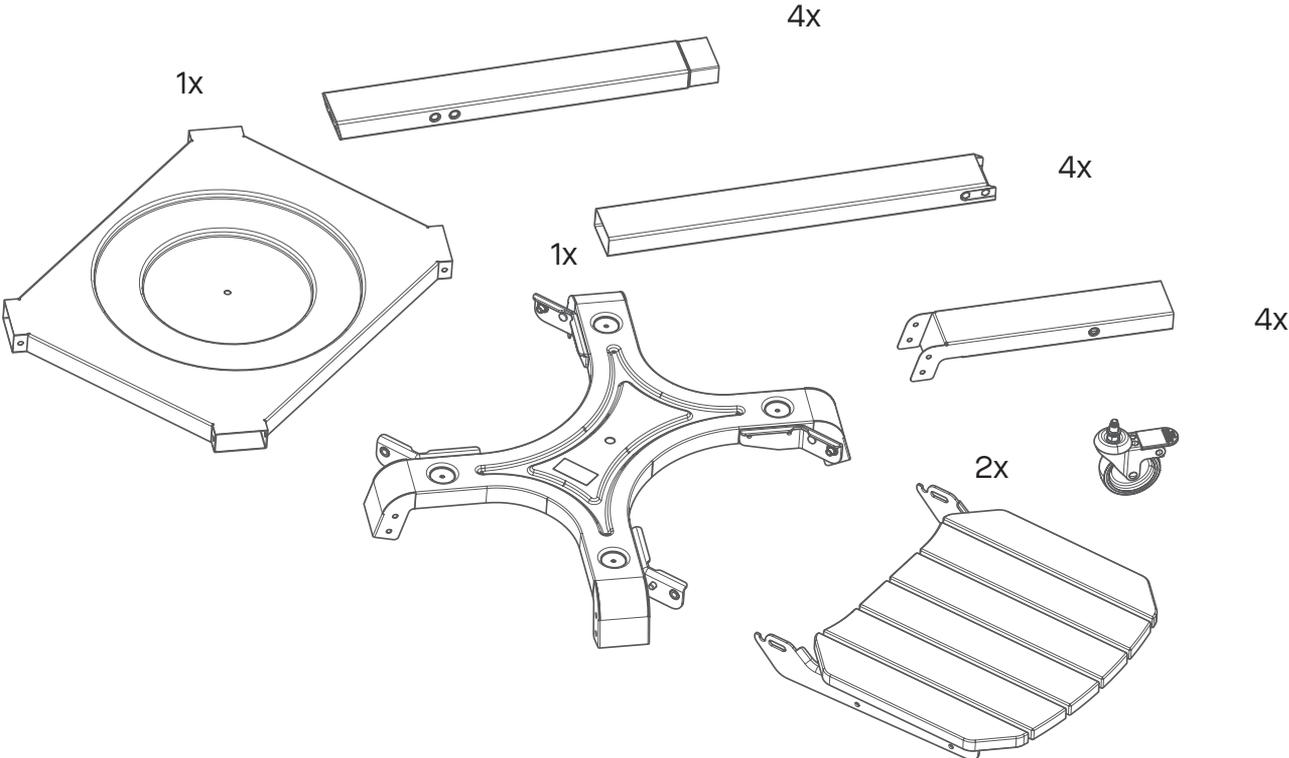

BUILD AREA

Build the stand in front of the area you intend to position Arc.

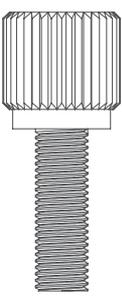

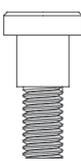

—
Ensure the ground is stable and level and capable of supporting the oven's weight.

—
Don't place any of the parts on an abrasive surface and avoid damaging the paintwork of the metal parts.

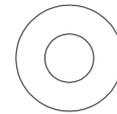

What's In The Box

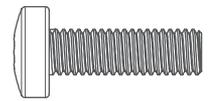

SCALE 1:1

F001	F002	F003	F004	F005	F006
1x	44x	4x	1x	4x	44x
					

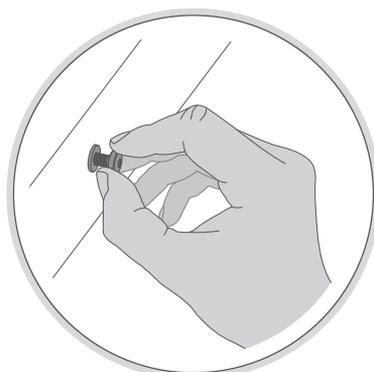

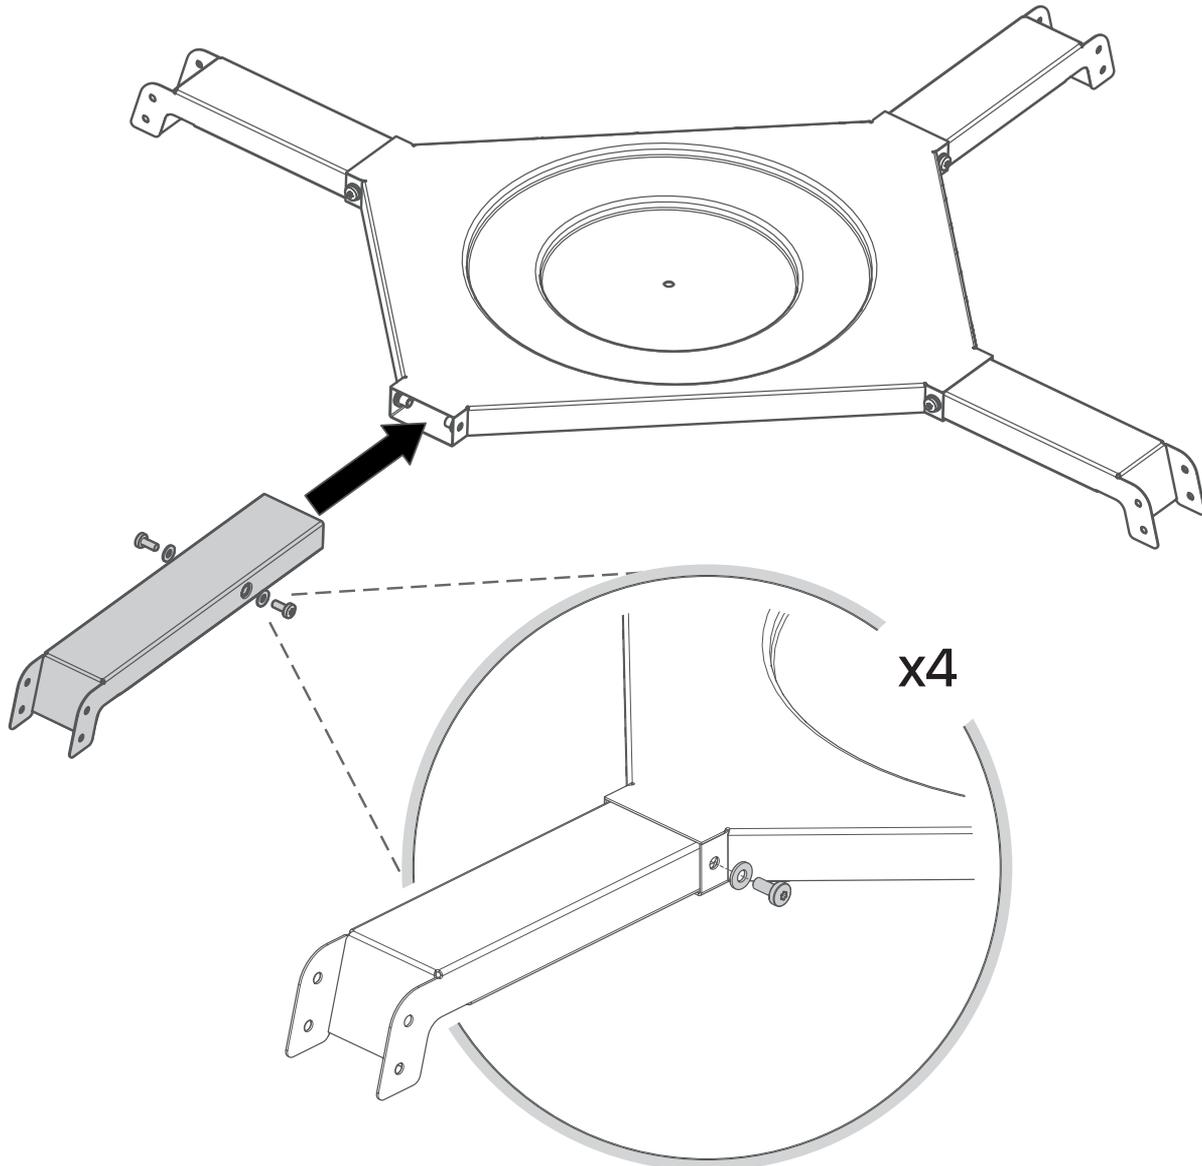

Step 1

F006
8x

F002
8x

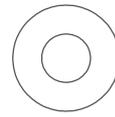

FIXINGS

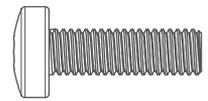

We recommend not fully tightening the bolts until the frame has been assembled.

—
This will ease the alignment of future fixings. Fully tighten at Step 5.

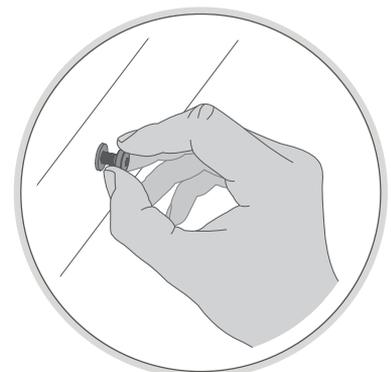

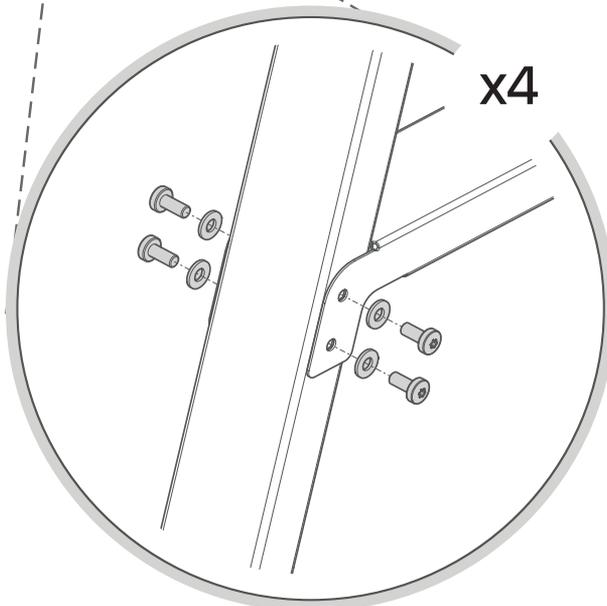

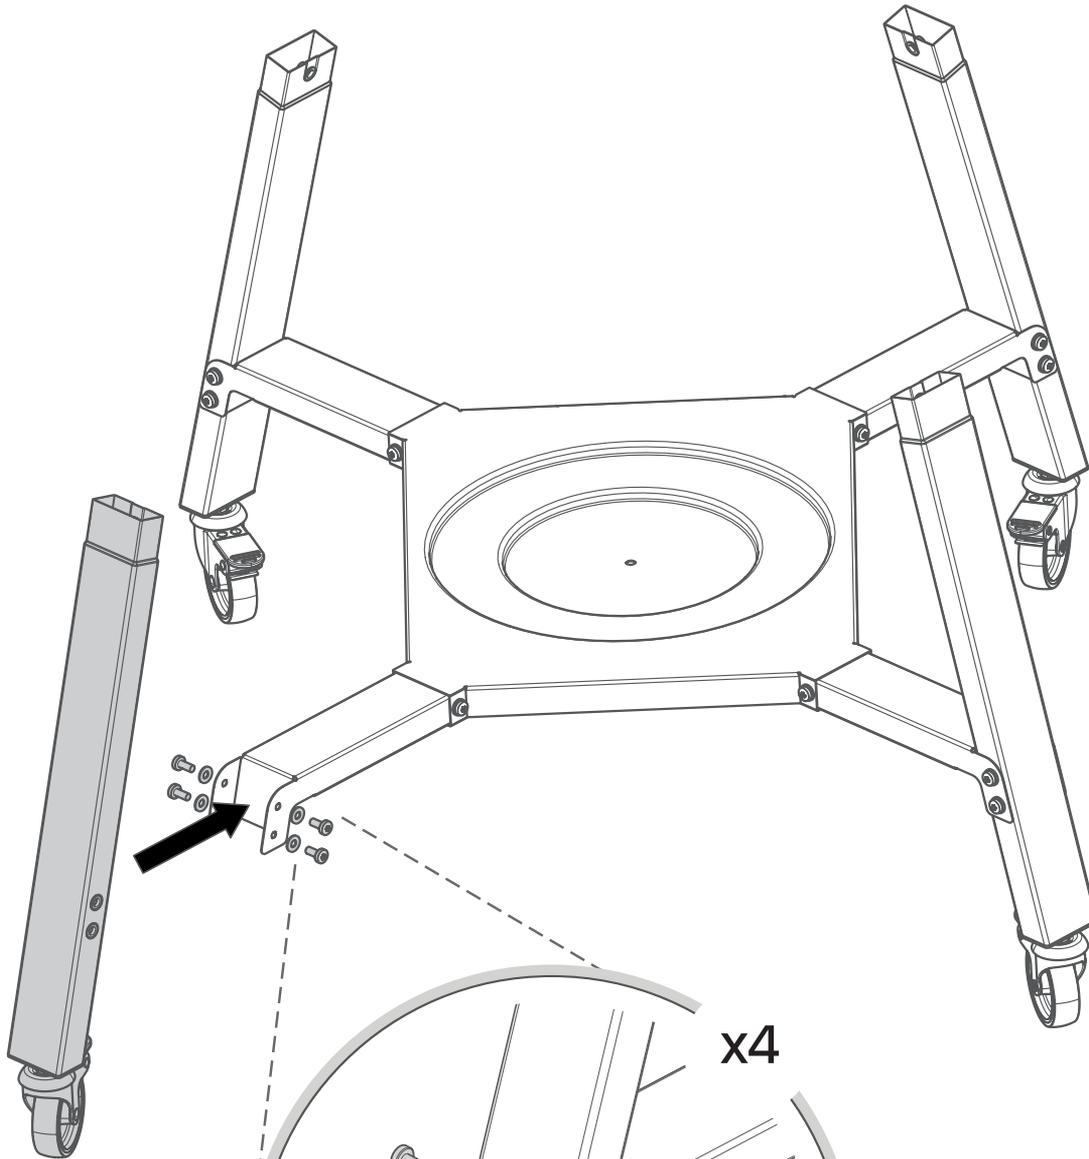

Step 2

F002
16x

Step 5

FIXINGS

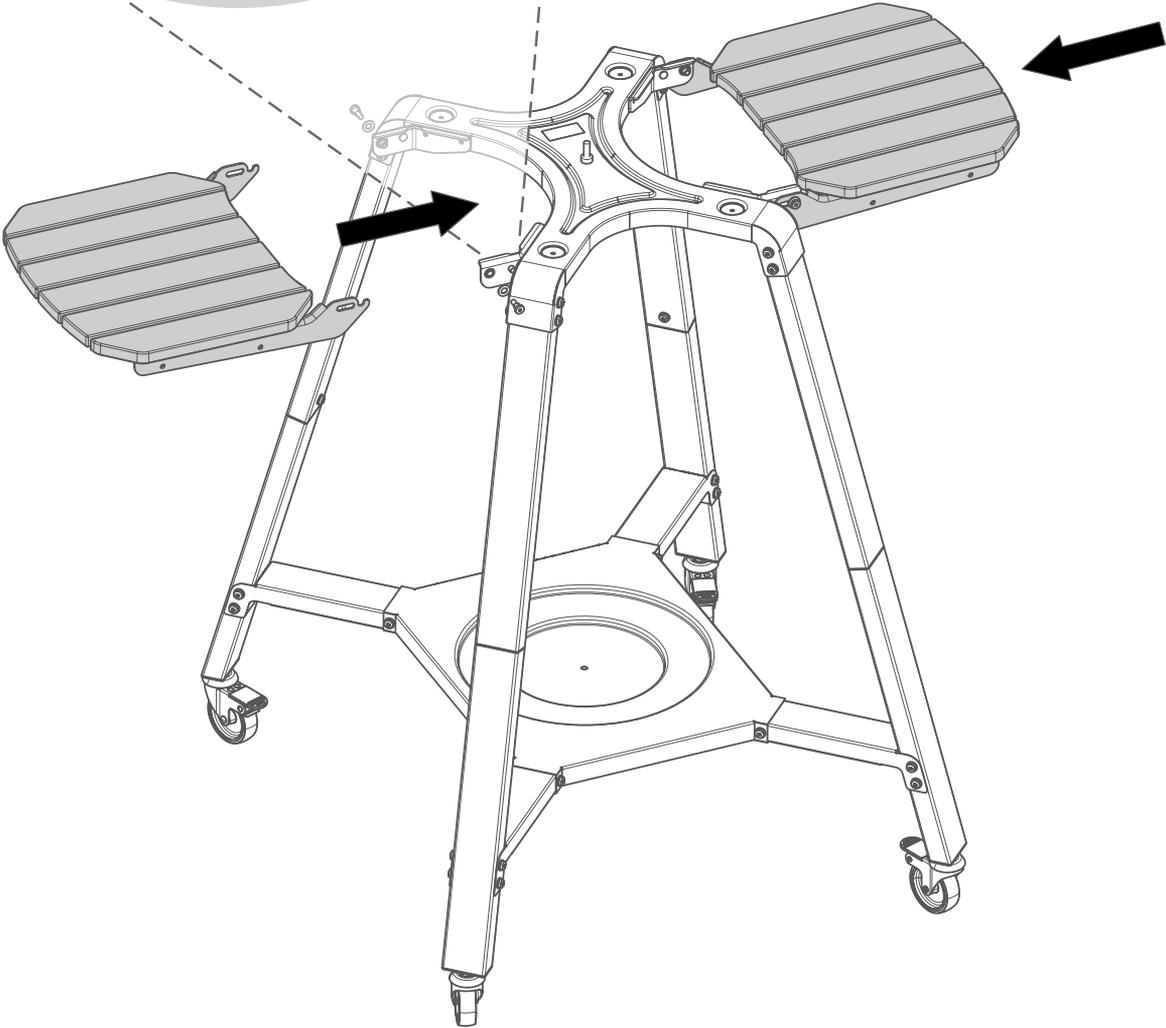

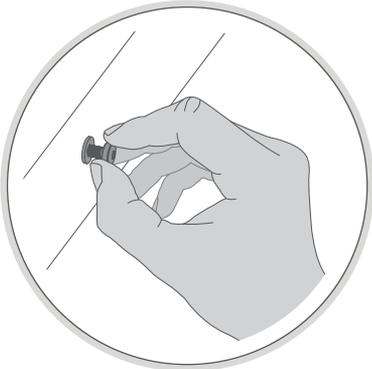

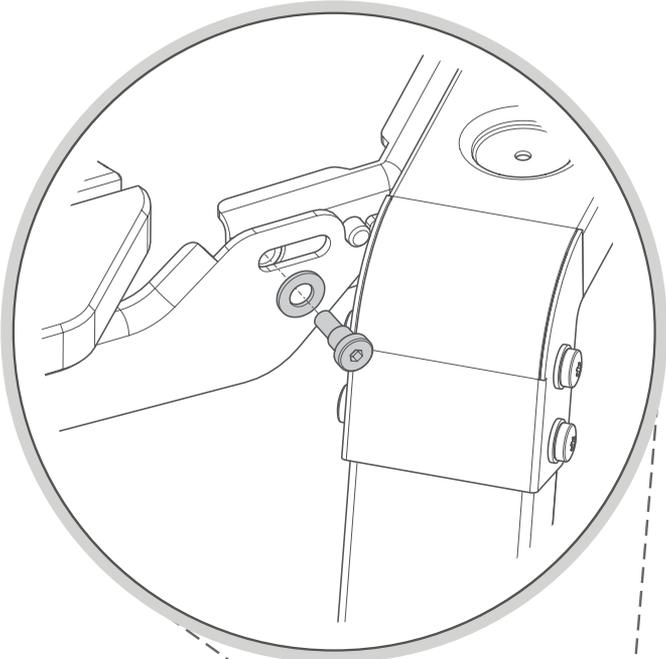

Tighten all fixings on the stand, being careful not to over tighten.

Step 6

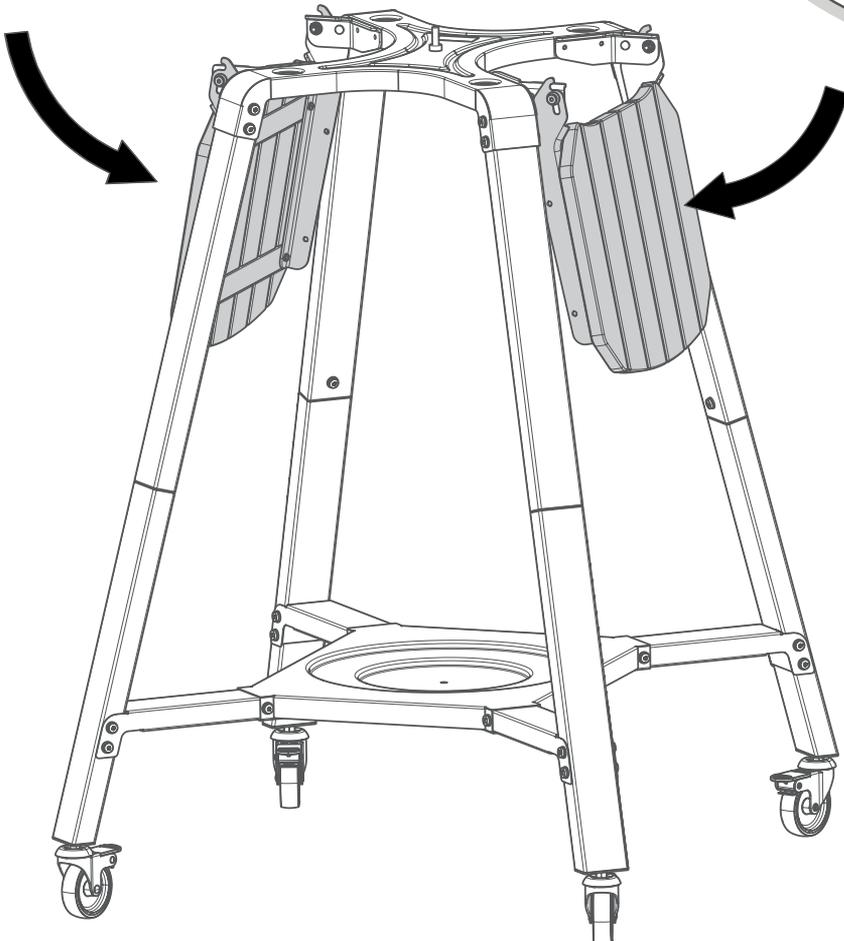

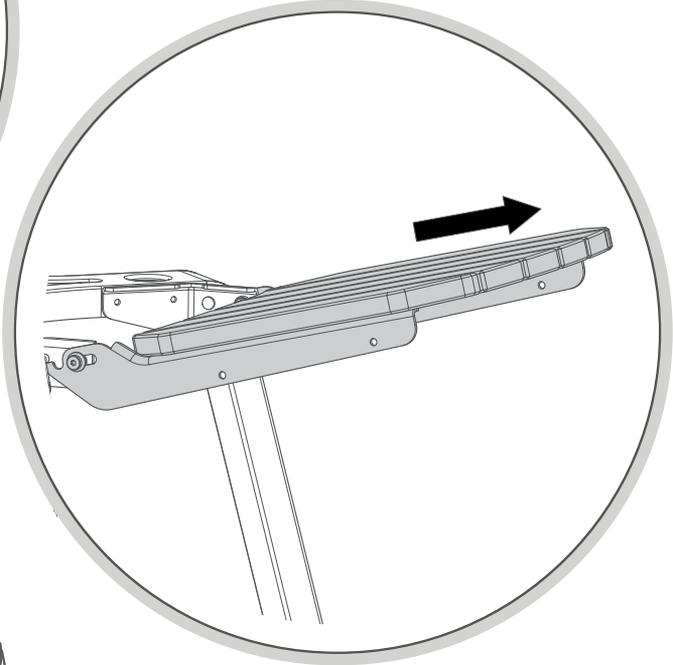

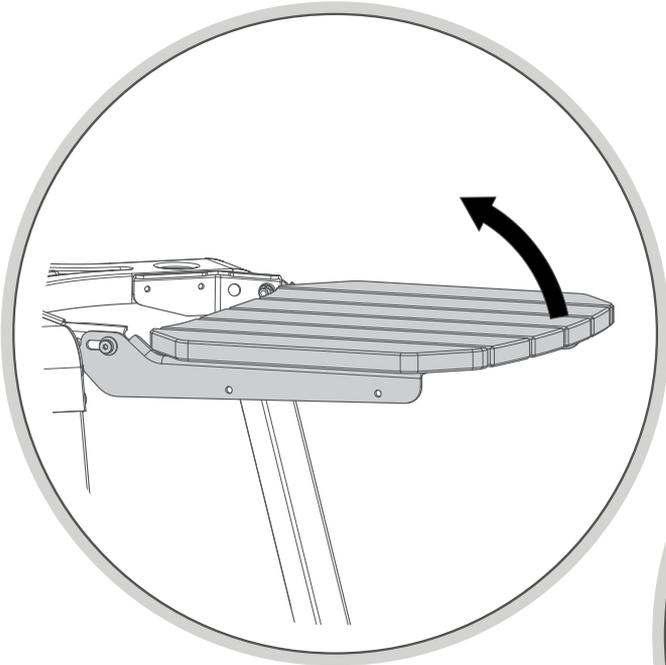

F005
4x

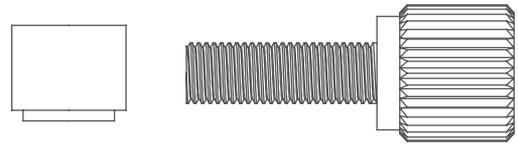

F003
4x

Step 7

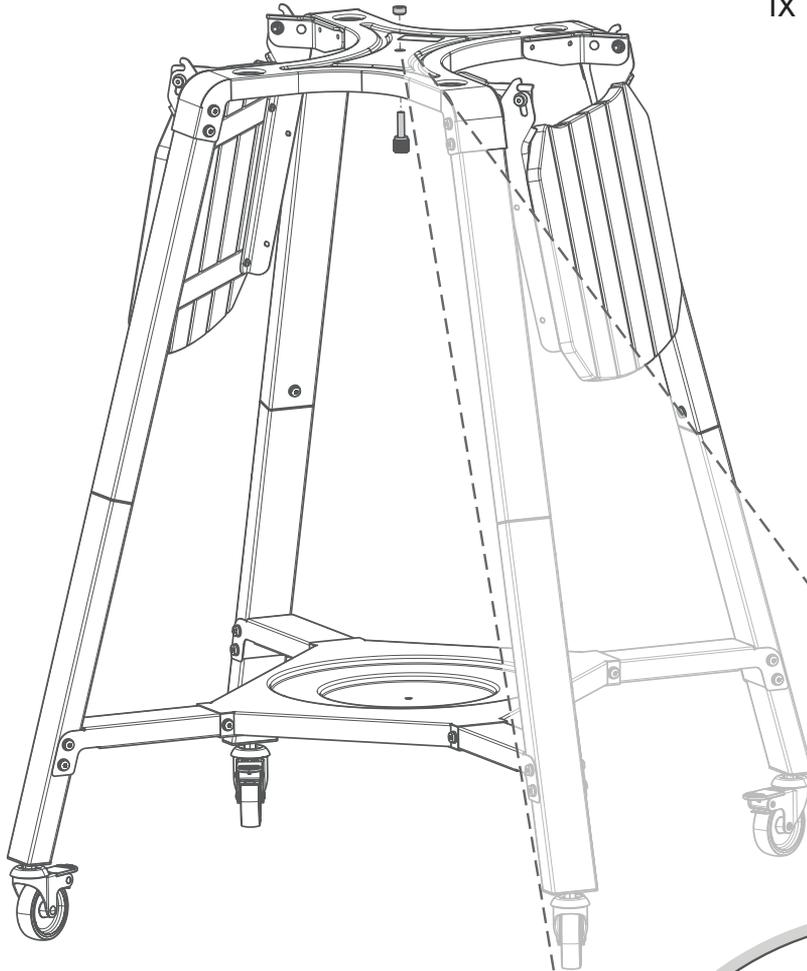

Step 8

F004
1x

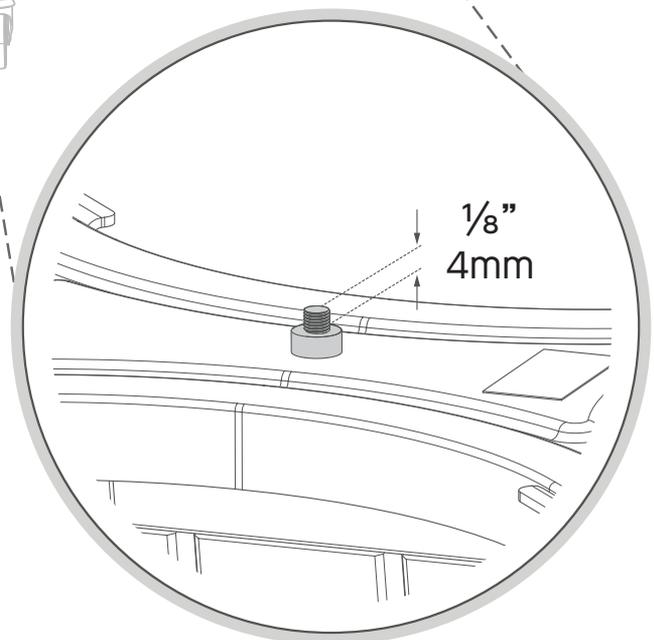

F001
1x

INSTALLING ARC

Before installing Arc, assemble fixings F006 and F003 into the top of the stand.

—
Don't fully tighten these two fixings, there needs to be around $\frac{1}{8}$ " (4mm) of thread exposed.

Step 9

INSTALLING ARC

Ensure fixing F006 and F003 are assembled into the stand before installing the oven.

—

Remove anything loose from the oven before moving.

—

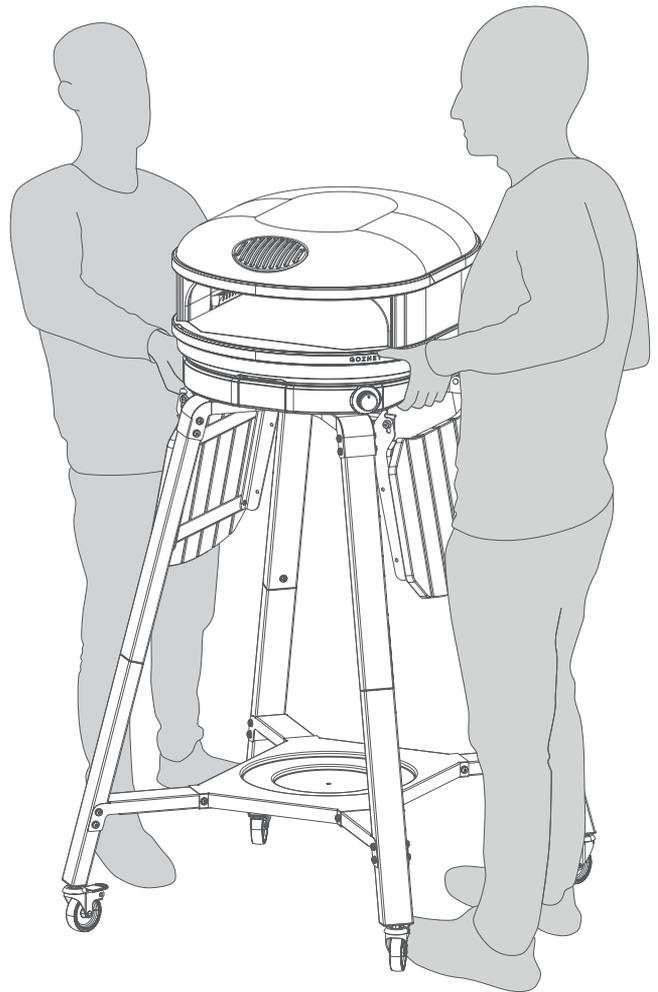

Two people should pick up Arc from the rounded ends of the oven as shown.

—

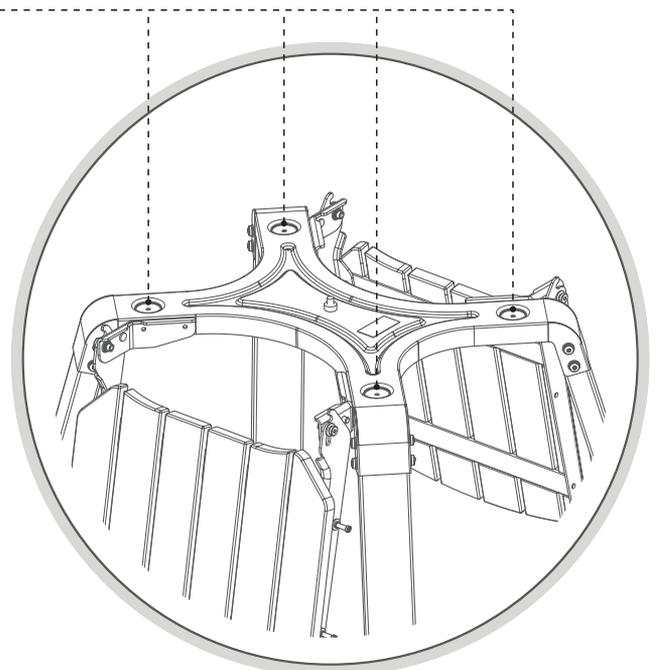

Never lift Arc on your own.

—

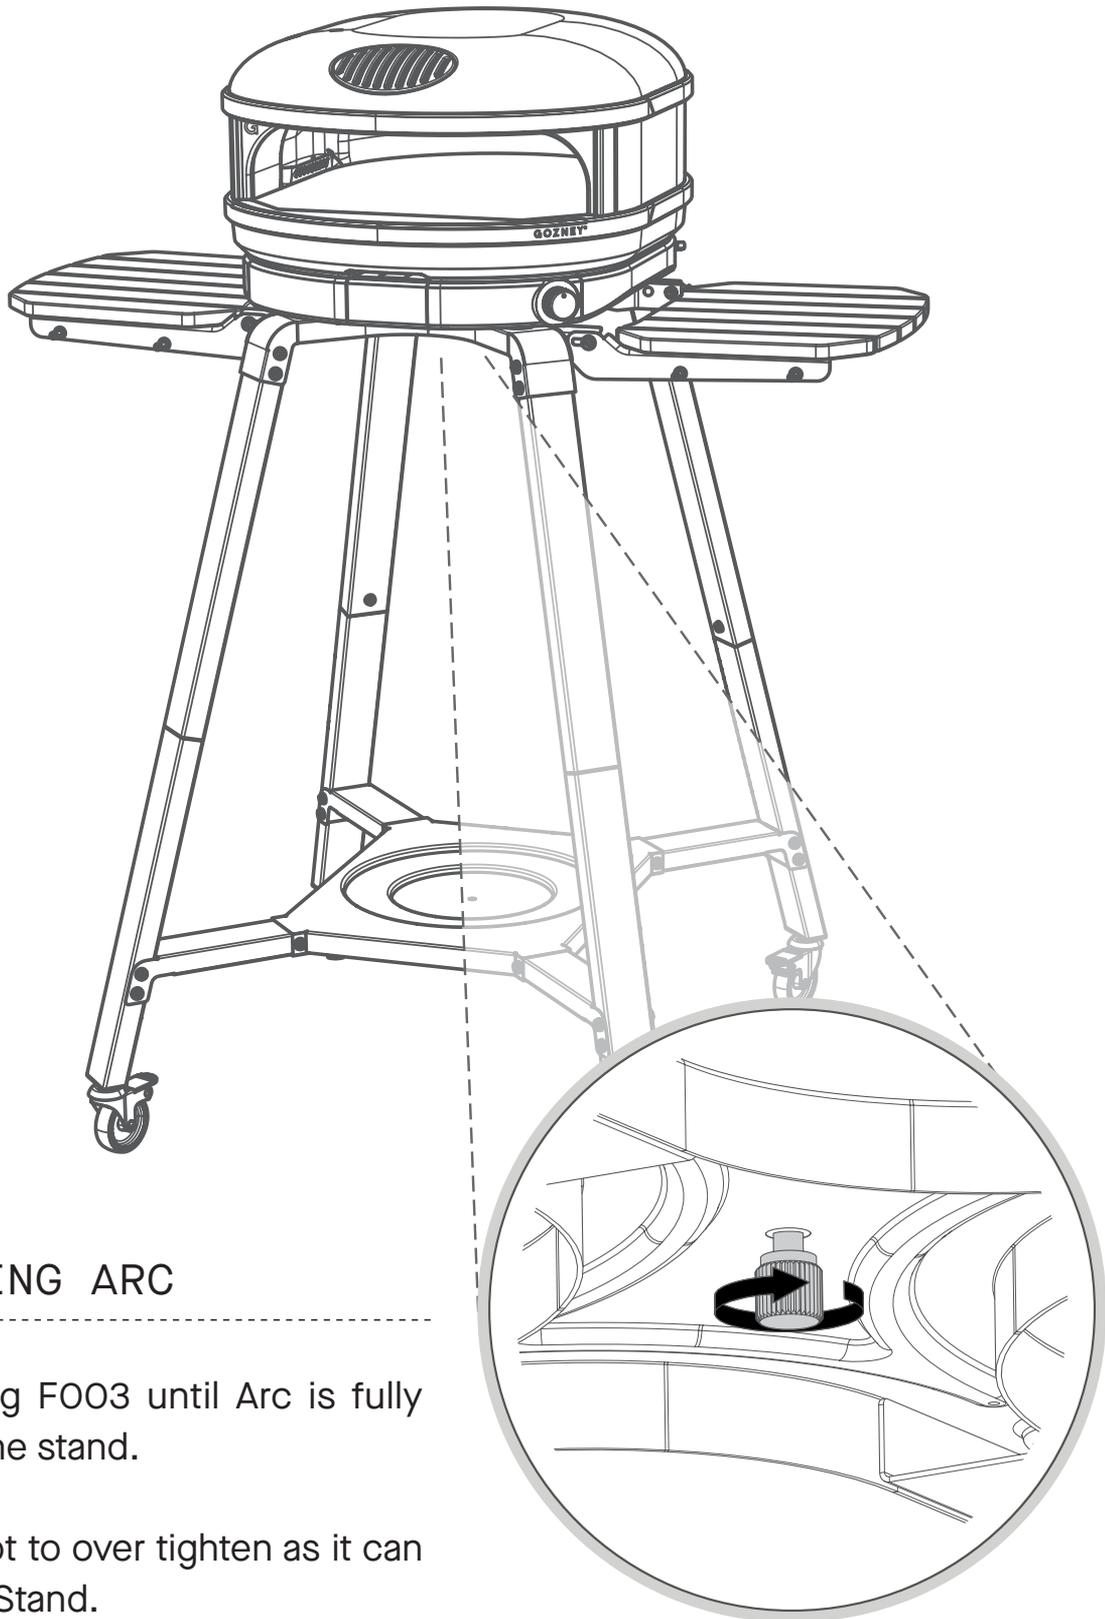

Don't use the mouth of the oven as lifting point.

Align Arc's feet with the highlighted slots. Ensure the feet are fully aligned before moving on.

Step 10

INSTALLING ARC

Tighten fixing F003 until Arc is fully secured to the stand.

—

Be careful not to over tighten as it can damage the Stand.

—

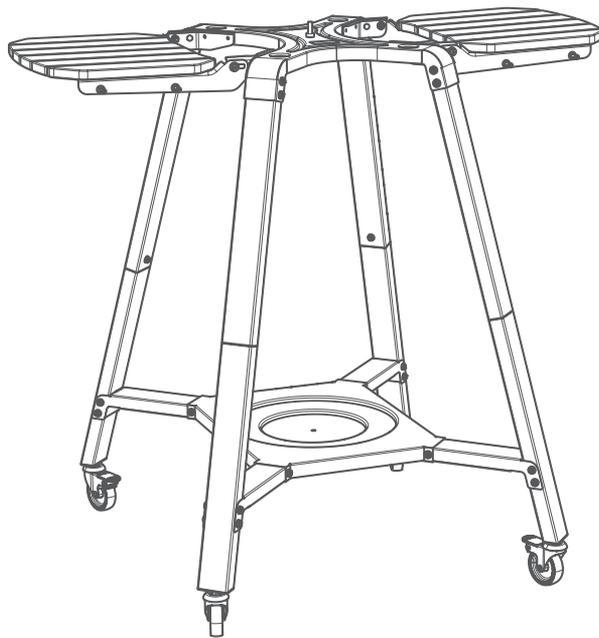

Never use Arc without it being secured to the stand.

Dieser Abschnitt beschreibt den Aufbau des Gestells und die korrekte Installation des Arcs.

Hinweise und Warnungen

Hinweise und Warnungen

Vergewissern Sie sich, dass Sie die Vorsichtshinweise und Warnungen in der mit dem Pizzaofen gelieferten Arc-Bedienungsanleitung vollständig gelesen und verstanden haben und diese befolgen.

—

Alle vier Rollen sollten immer arretiert sein, wenn der Pizzaofen nicht bewegt werden soll.

—

Versuchen Sie niemals, den Ofen zu bewegen, wenn er noch warm ist, sondern warten Sie, bis er vollständig abgekühlt ist.

—

Wenn Sie den Pizzaofen auf dem Gestell bewegen, schieben/ziehen Sie immer am Gestell und nicht am Pizzaofen.

—

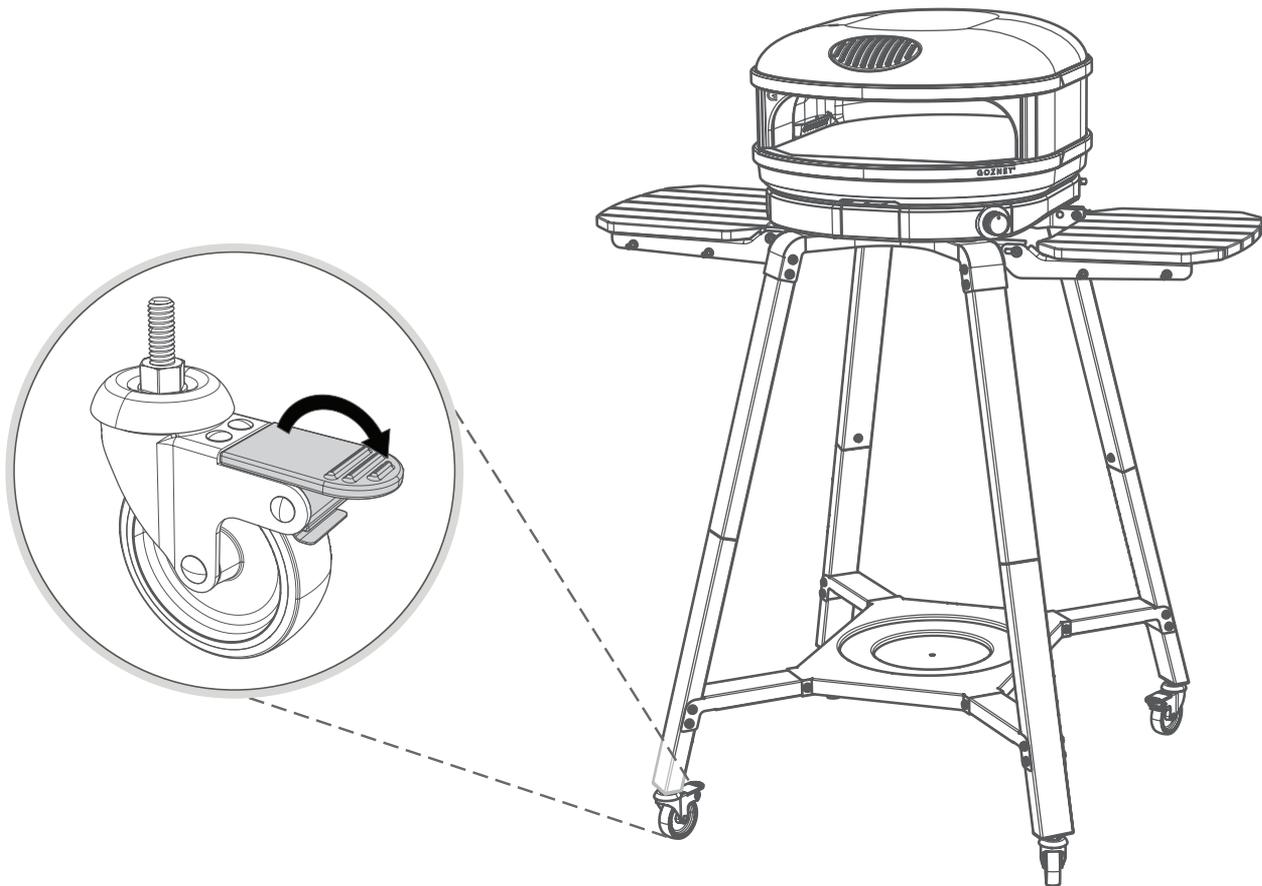

Entfernen Sie alle losen Elemente aus dem Gestell und den Ablagen, bevor Sie den Pizzaofen bewegen.

Wenn Sie heiße Gegenstände aus dem Pizzaofen auf die Holzeinlegeböden stellen, können diese beschädigt werden; verwenden Sie geeignete Unterlagen, um Schäden zu vermeiden.

Wenn Sie Holzflächen über einen längeren Zeitraum direkter Sonneneinstrahlung und Regen aussetzen, können die Schutzschichten Schaden erleiden. Gehen Sie deshalb wie folgt vor:

1. Schützen Sie das Gerät vor Sonnenlicht, wenn Sie es nicht benutzen.
2. Trocknen Sie Holzflächen nach Kontakt mit Feuchtigkeit mit einem weichen Tuch ab.
3. Tragen Sie alle 8 Wochen ein Pflegeöl für Gartenmöbel auf.

Gas Pizzaofen

Trennen Sie den Pizzaofen immer von der Gasversorgung, bevor Sie ihn bewegen.

—

Die Rollen sollten immer arretiert sein, wenn der Pizzaofen an die Gasversorgung angeschlossen ist, auch wenn der Pizzaofen nicht benutzt wird.

Vergewissern Sie sich, dass Sie einen von Gozney gelieferten Gasanschluss oder einen Anschluss verwenden, der der Norm für bewegliche Gasgeräte (ANSI Z21.69 / CSA 6.16) entspricht, sowie eine Schnelltrennvorrichtung, die den einschlägigen Normen (ANSI Z21.41 / CSA 6.9) entspricht.

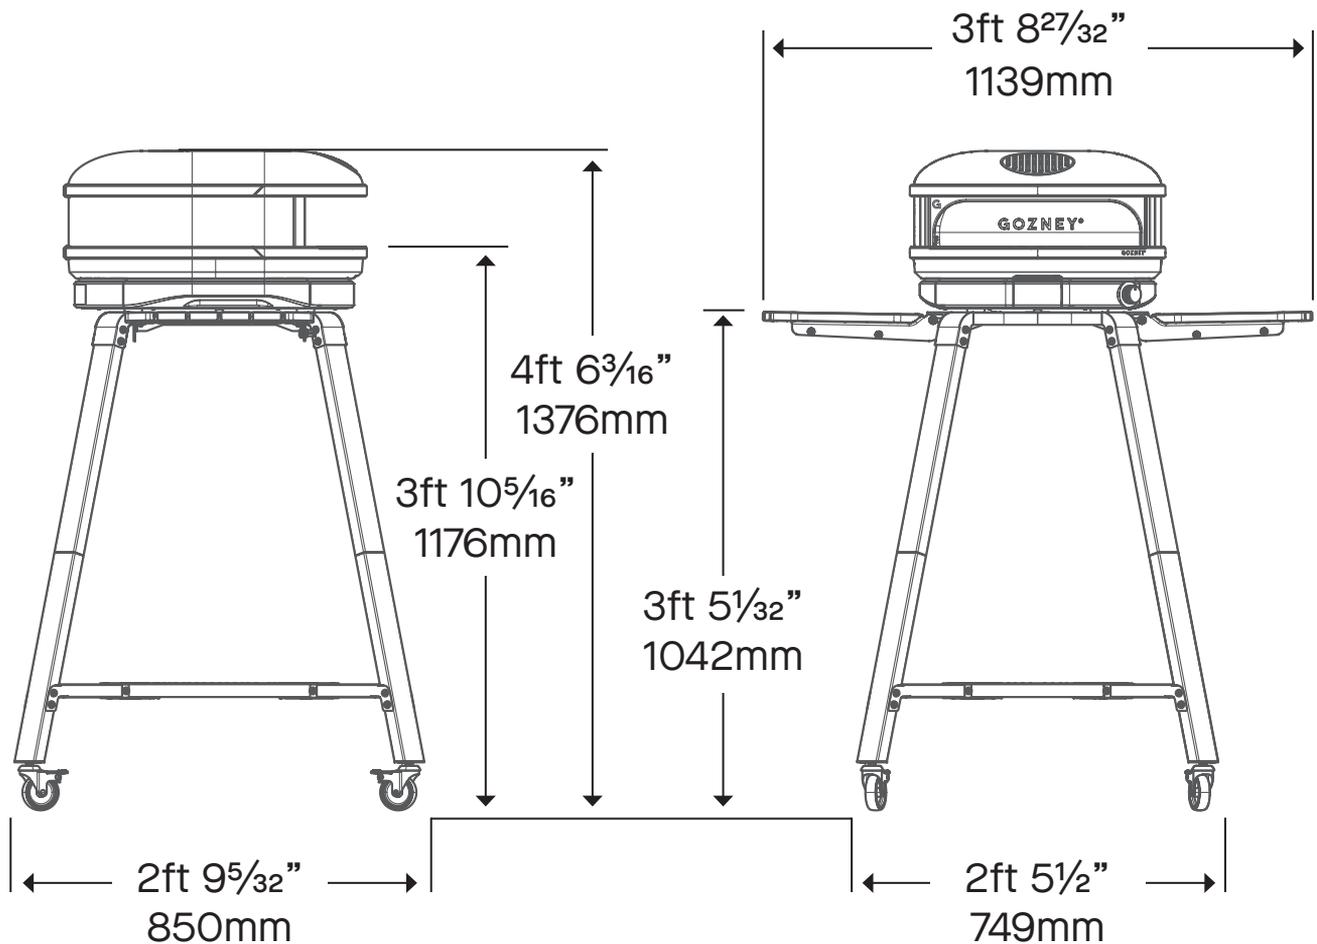

Der Gasanschluss und die Schnelltrennvorrichtung oder die dazugehörigen Rohrleitungen sollten niemals dazu verwendet werden, die Bewegung des Geräts einzuschränken.

Dieser Abschnitt beschreibt den Aufbau des Gestells und die korrekte Installation des Arcs.

Aufbau und Installation

Aufbauanleitung

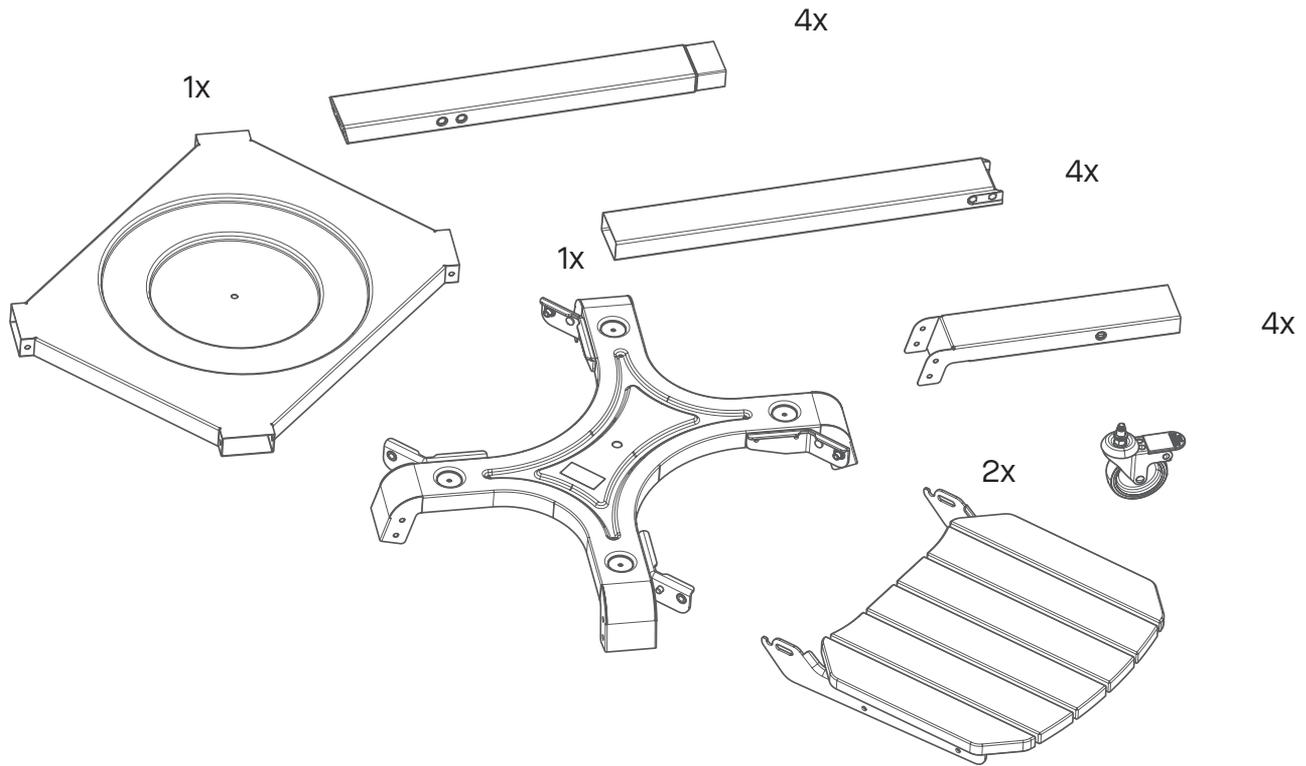

BAUBEREICH

Bauen Sie das Gestell vor dem Bereich auf, in dem Sie den Arc aufstellen möchten.

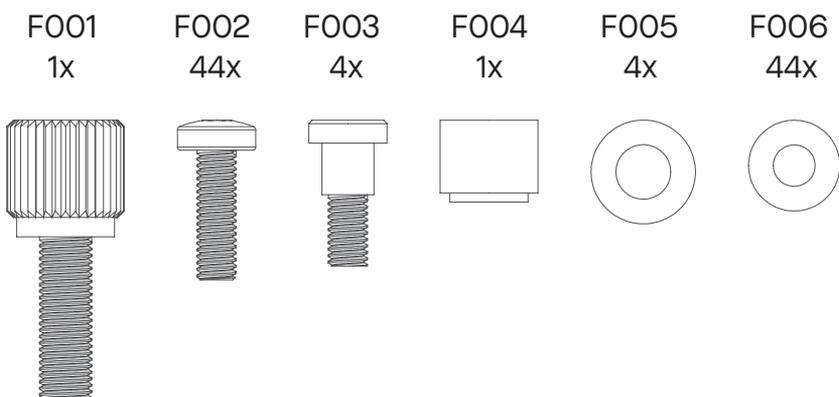

Stellen Sie sicher, dass der Boden stabil und eben ist und das Gewicht des Ofens tragen kann.

Legen Sie keines der Teile auf eine scheuernde Oberfläche und vermeiden Sie es, die Lackierung der Metallteile zu beschädigen.

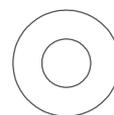

Lieferumfang

INSTALLIEREN DES ARCS

Montieren Sie vor der Installation des Arcs die Befestigungen F006 und F003 oben am Gestell.

Ziehen Sie diese beiden Befestigungen nicht ganz fest; es muss etwa 4 mm Gewinde frei bleiben.

Schritt 9

INSTALLIEREN DES ARCS

Vergewissern Sie sich, dass die Befestigungen F006 und F003 im Gestell montiert sind, bevor Sie den Backofen einbauen.

—

Entfernen Sie alle losen Elemente am Ofen, bevor Sie ihn bewegen.

—

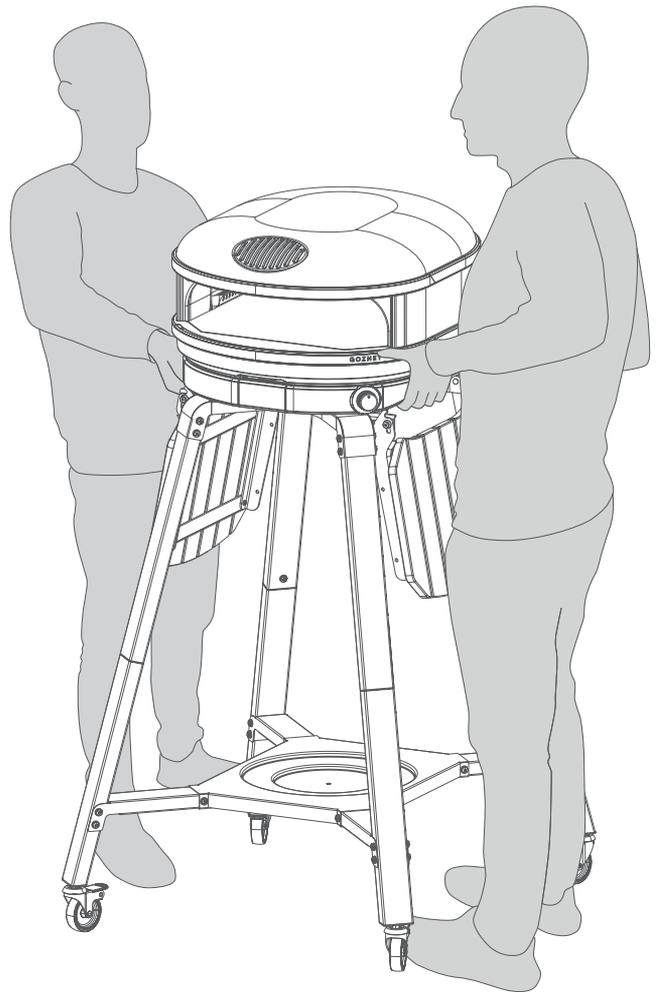

Der Arc sollte von zwei Personen an den abgerundeten Enden des Ofens angehoben werden (wie abgebildet).

—

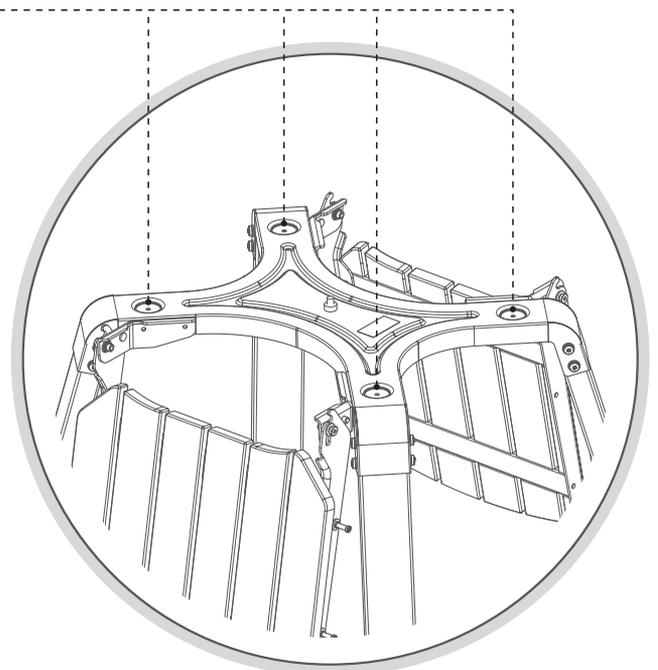

Heben Sie den Arc niemals allein an.

—

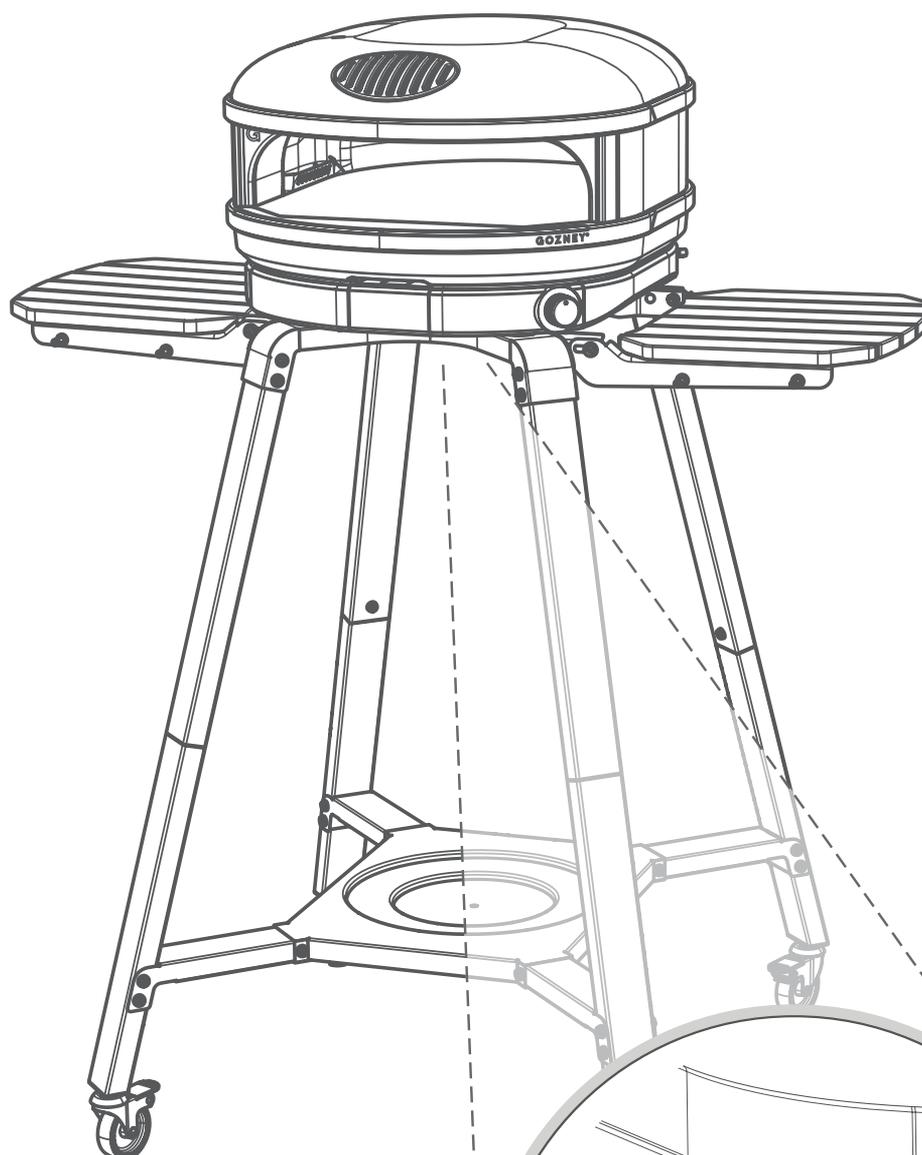

Verwenden Sie nicht die Öffnung des Backofens als Hebe­punkt.

Richten Sie die Füße des Arcs an den markierten Schlitz­en aus. Stellen Sie sicher, dass die Füße vollständig ausgerichtet sind, bevor Sie fortfahren.

Schritt 10

INSTALLIEREN DES ARCS

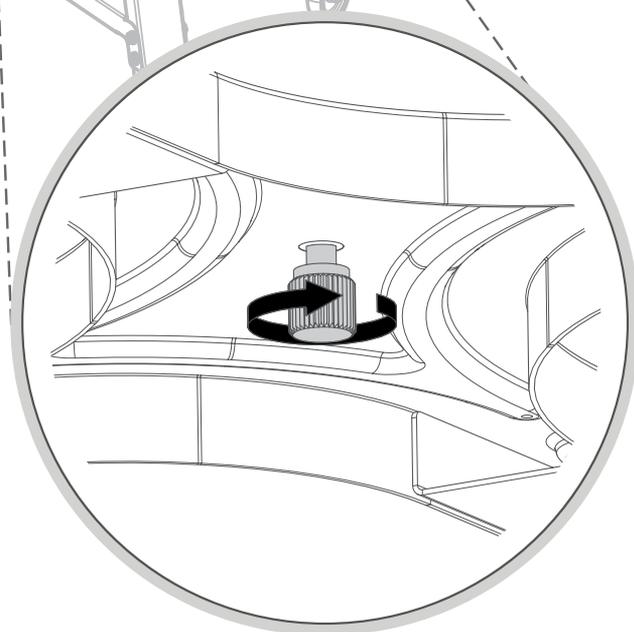

Ziehen Sie die Befestigung F003 fest, bis der Arc vollständig am Gestell befestigt ist.

—

Achten Sie darauf, dass Sie nicht zu fest anziehen, da dies das Gestell beschädigen kann.

—

Verwenden Sie den Arc niemals, ohne ihn am Ständer zu befestigen.

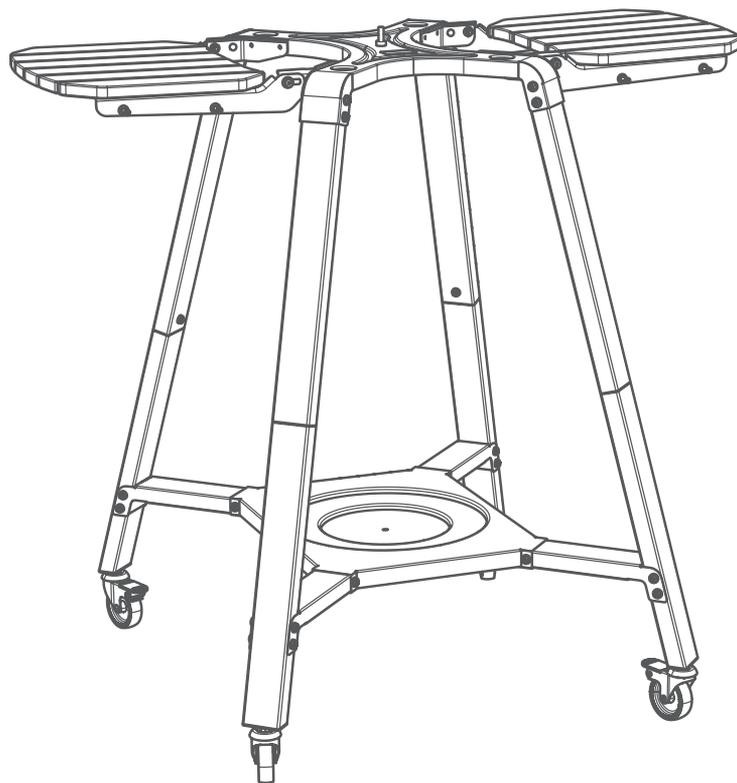

Esta sección detalla el proceso de montaje y la instalación correcta del soporte Arc Stand.

Precauciones y advertencias

Precauciones y advertencias

Asegúrese de haber leído, entendido y seguido todas las precauciones y advertencias del manual del usuario de Arc que viene con el horno.

Las cuatro ruedas deben estar siempre bloqueadas a menos que esté moviendo el horno.

Nunca intente mover el horno mientras esté caliente, espere a que se enfríe completamente.

Al mover el horno cuando esté en el soporte, empuje o tire siempre del soporte, nunca del horno.

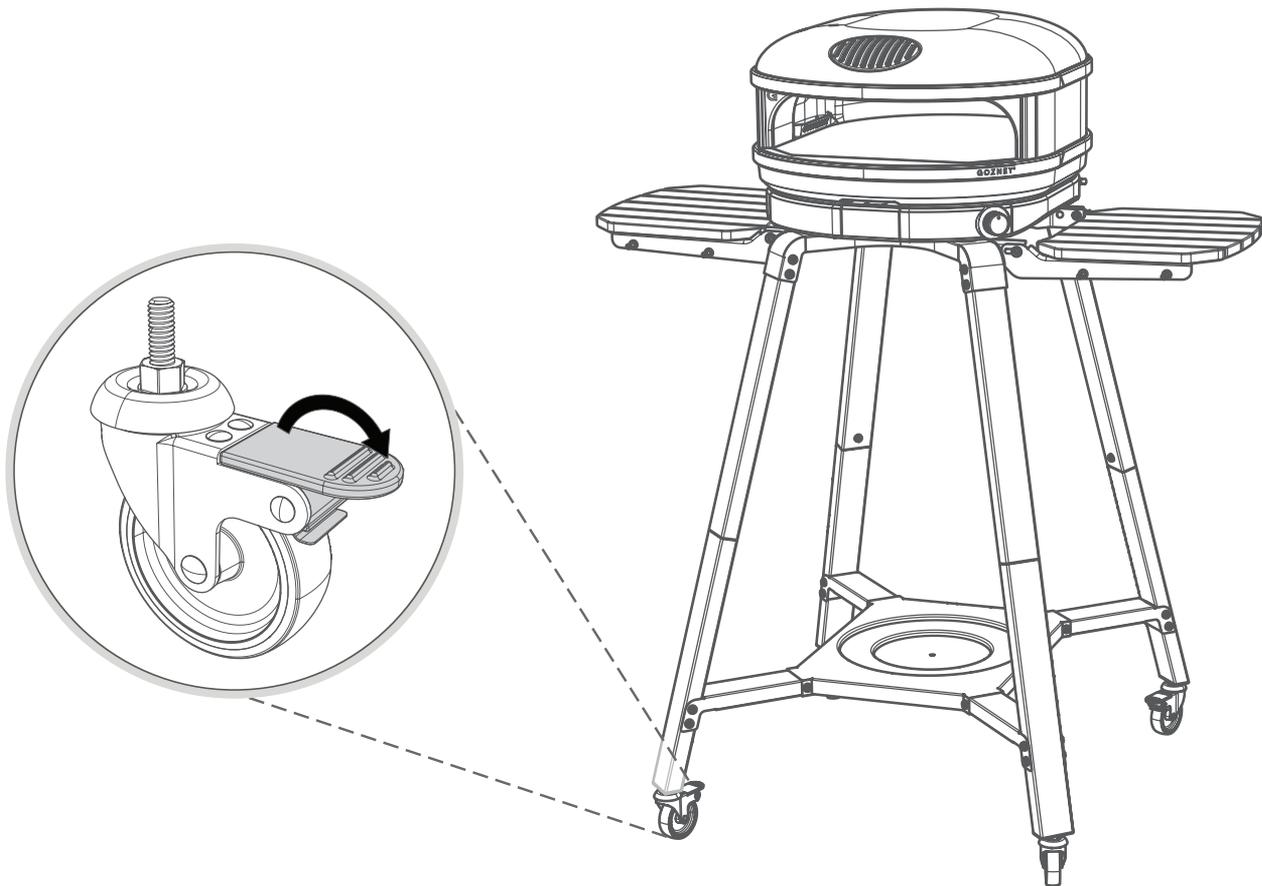

Retire cualquier objeto suelto del soporte y sus estantes antes de moverlo.

Colocar objetos calientes recién salidos del horno en los estantes de madera puede dañarlos; utilice una protección adecuada para evitar el deterioro.

Exponer la madera a la luz solar directa y a la lluvia durante periodos prolongados puede hacer que las capas protectoras se descompongan. Para evitar esto, siga los siguientes pasos:

1. Guarde la unidad en un lugar protegido de la luz del sol cuando no esté en uso.
2. Seque la madera con un paño suave si ha estado expuesta a la humedad.
3. Aplique un tratamiento de aceite para muebles de exterior cada 8 semanas.

Horno de gas

Desconecte siempre el horno del suministro de gas antes de moverlo.

—
Las ruedas deben estar siempre bloqueadas cuando el horno esté conectado a un suministro de gas, incluso aunque no esté en uso.

Asegúrese de utilizar un conector de gas suministrado por Gozney o uno que cumpla con la norma para aparatos de gas móviles (ANSI Z21.69 / CSA 6.16), y un dispositivo de desconexión rápida que cumpla con las normas relevantes (ANSI Z21.41 / CSA 6.9).

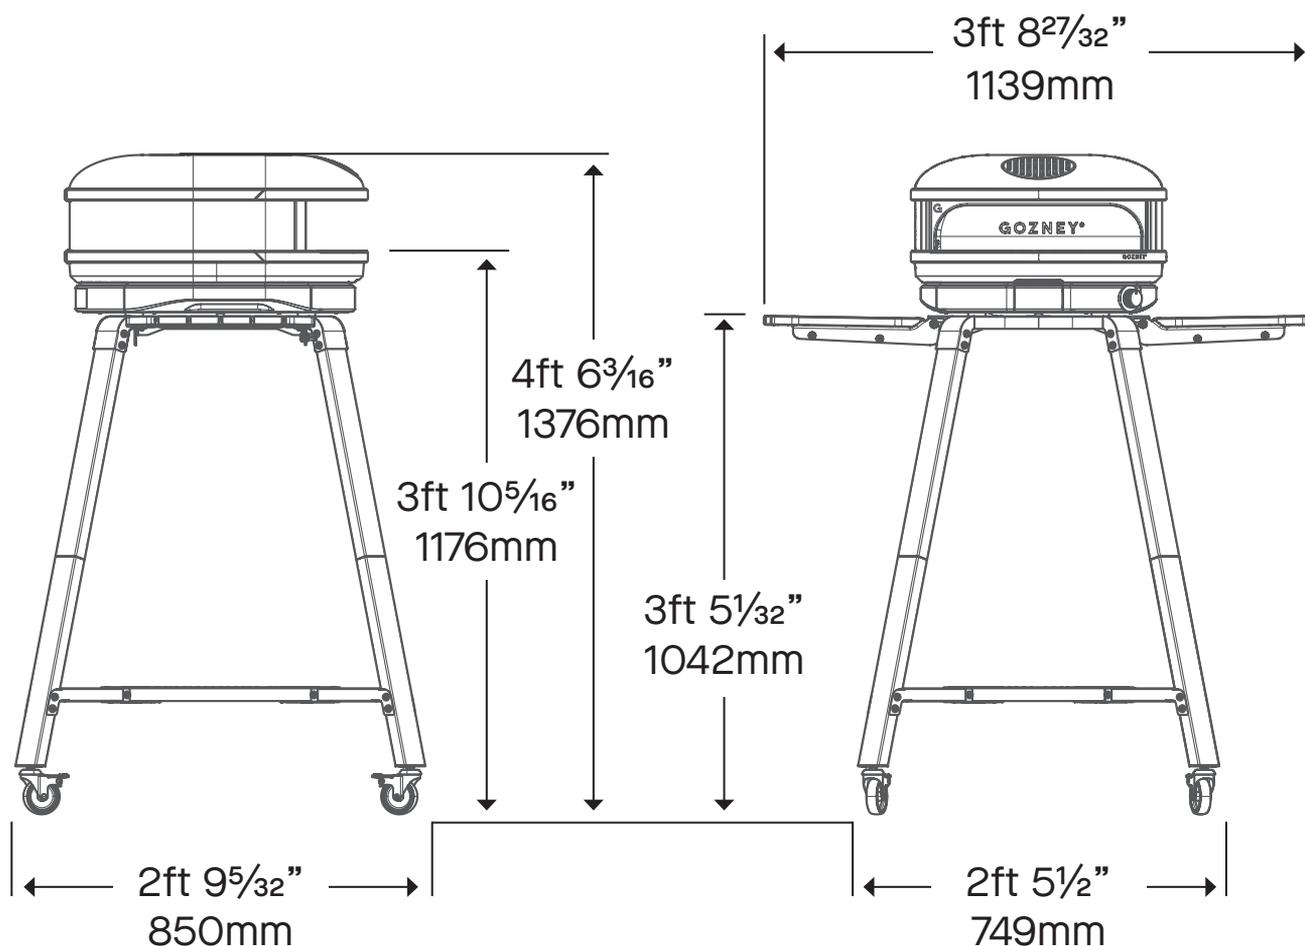

El conector de gas y el dispositivo de desconexión rápida o la tubería asociada nunca deben utilizarse para limitar el movimiento del aparato.

Esta sección detalla el proceso de montaje y la instalación correcta del soporte Arc Stand.

Montaje e instalación

Manual de montaje

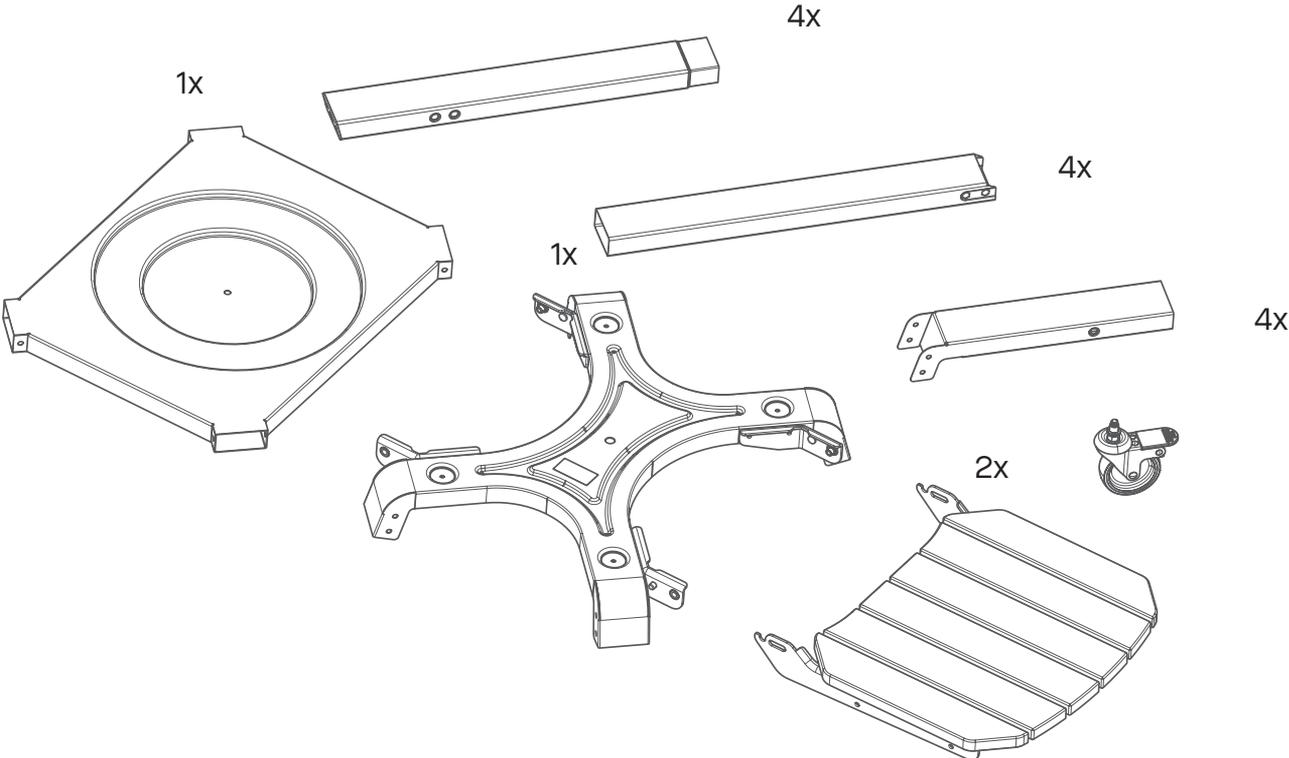

ZONA DE MONTAJE

Monte el soporte junto a la zona en la que quiera colocar Arc.

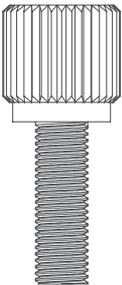

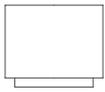

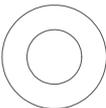

Asegúrese de que el suelo sea estable, esté nivelado y pueda soportar el peso del horno.

No coloque ninguna de las piezas sobre una superficie abrasiva y tenga cuidado de no dañar la pintura de las piezas metálicas.

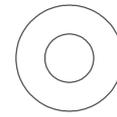

Contenido de la caja

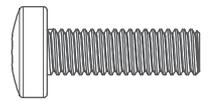

ESCALA 1:1

Paso 7

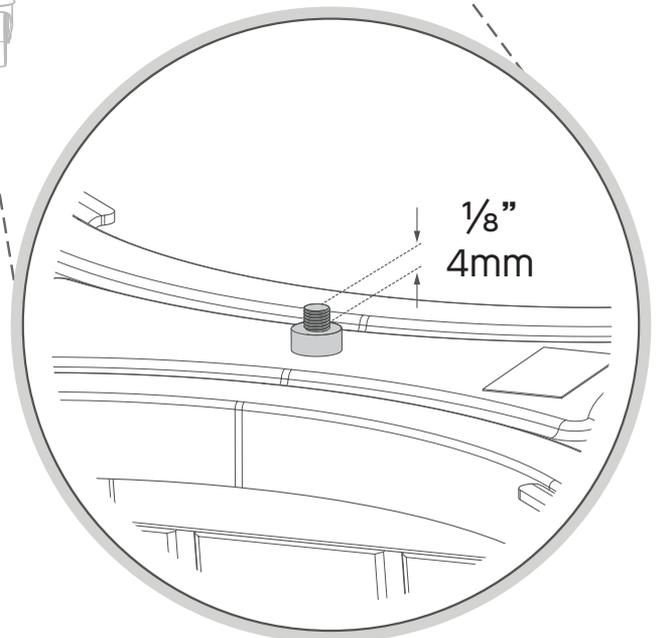

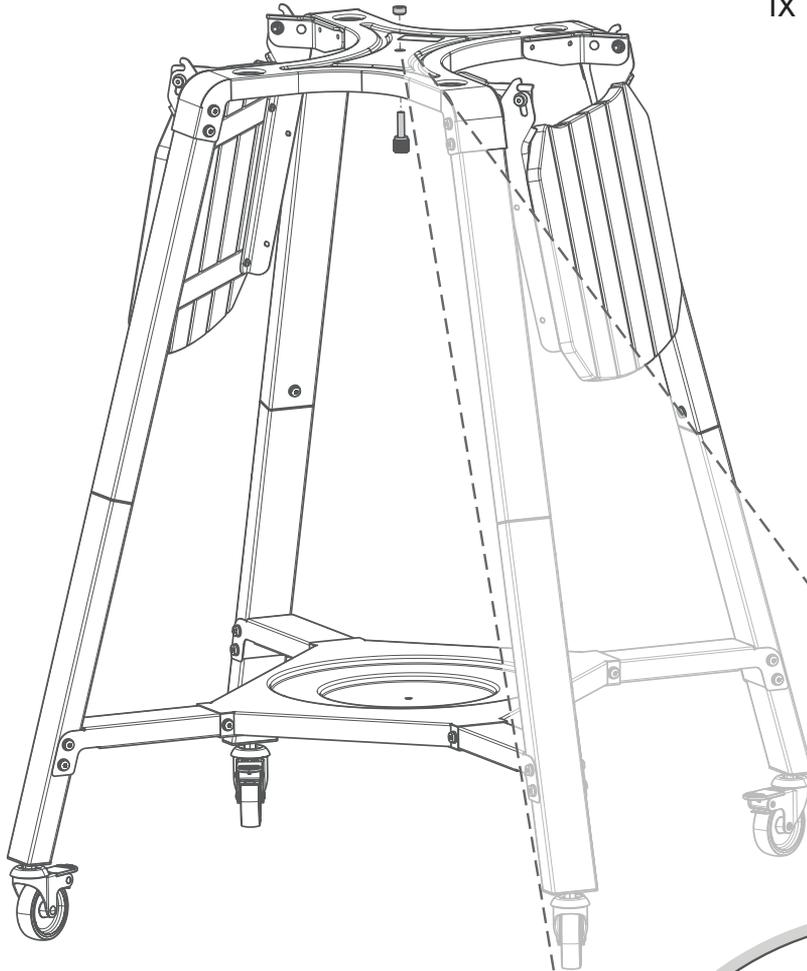

Paso 8

F004
1x

F001
1x

INSTALACIÓN DE ARC

Antes de instalar Arc, coloque las fijaciones F006 y F003 en la parte superior del soporte.

—
No apriete del todo estas dos fijaciones; solo deben sobresalir unos 4 mm de la rosca.

Paso 9

INSTALACIÓN DE ARC

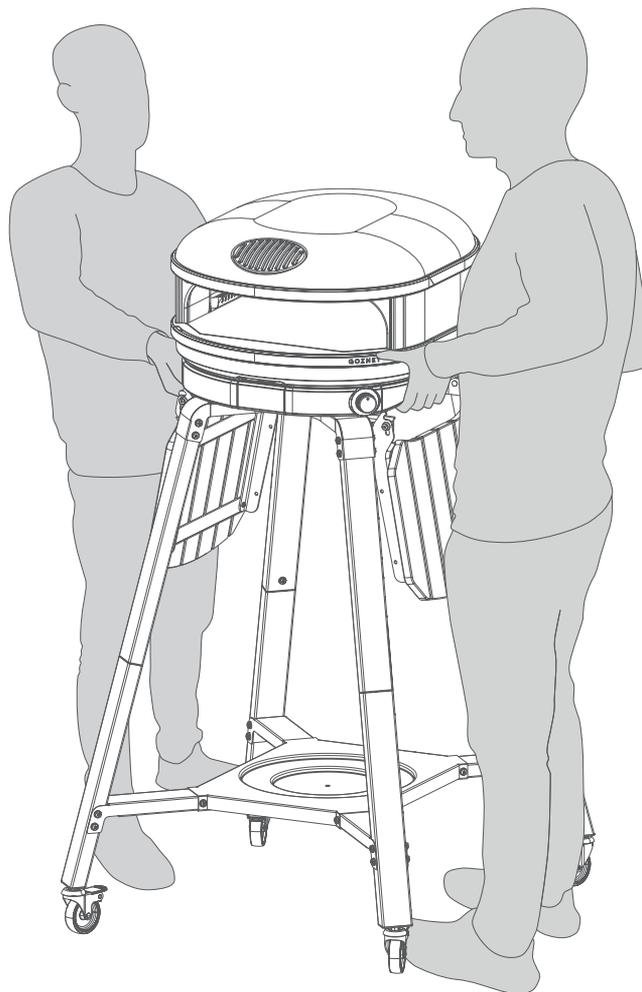

Asegúrese de que las fijaciones F006 y F003 estén colocadas en el soporte antes de instalar el horno.

—
Retire cualquier objeto suelto del horno antes de moverlo.

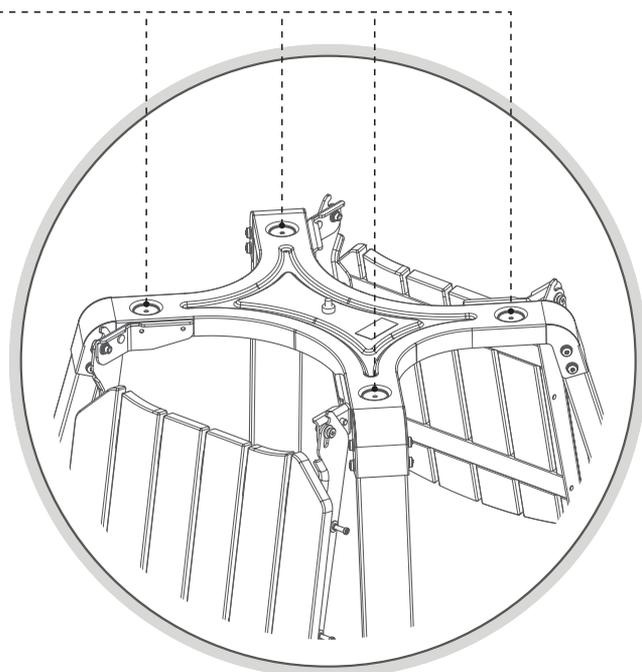

—
Para levantar Arc es necesaria la fuerza de dos personas, que deberán agarrar el horno de sus extremos redondeados, tal y como se muestra en la imagen.

—
Nunca levante Arc solo.

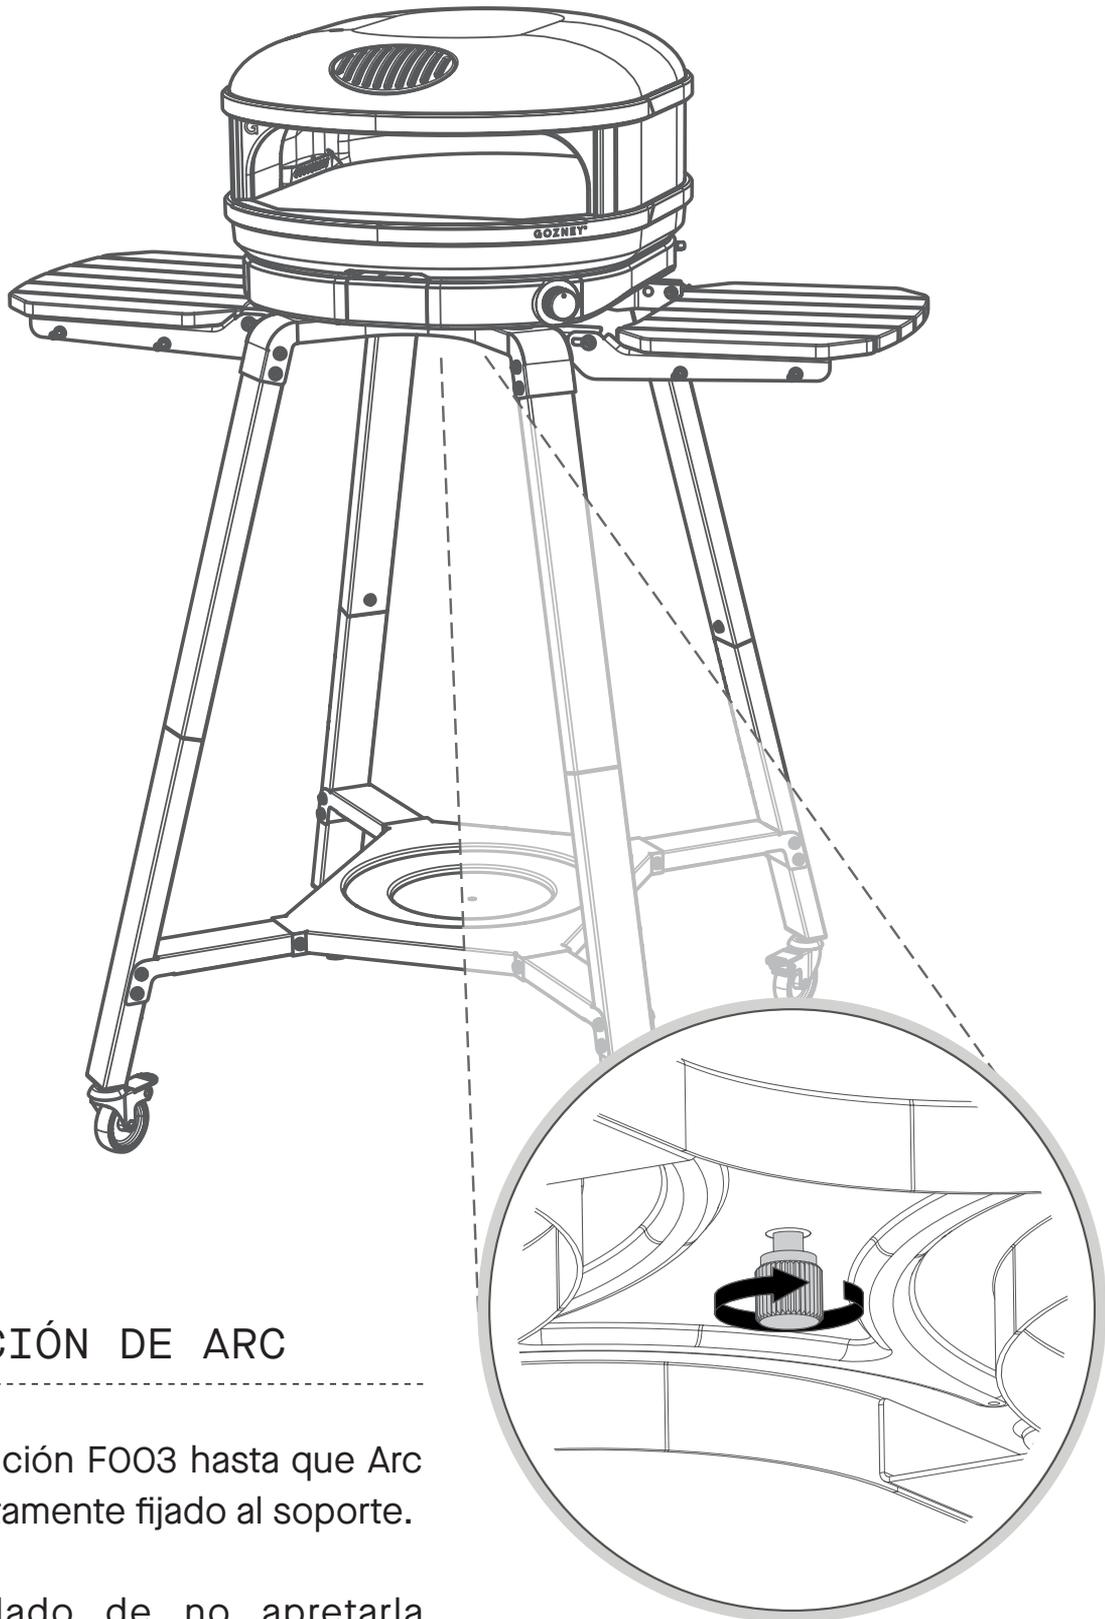

—
No se agarre de la boca del horno para levantarlo.

Alinee los pies de Arc con las ranuras resaltadas. Asegúrese de que los pies estén completamente alineados antes de continuar.

Paso 10

INSTALACIÓN DE ARC

Apriete la fijación F003 hasta que Arc esté completamente fijado al soporte.

—
Tenga cuidado de no apretarla demasiado, ya que podría dañar el soporte.

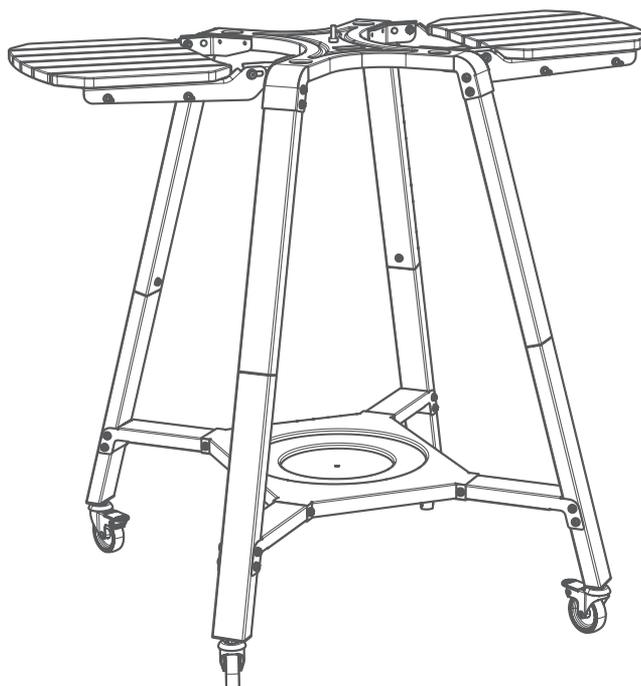

—
No utilice nunca Arc sin fijarlo al soporte.

Cette partie détaille le processus de montage du support et l'installation appropriée du Dôme.

Précautions et mise en garde

Précautions et mise en garde

Assurez-vous d'avoir entièrement lu, compris et respecté les avertissements et mises en garde contenues dans le Manuel d'utilisation du Dôme fourni avec le four.

—

Les quatre roulettes doivent toujours être bloquées sauf si vous déplacez le four.

—

N'essayez jamais de déplacer le four lorsqu'il est encore chaud. Attendez d'abord qu'il refroidisse complètement.

—

Lorsque vous déplacez le four sur le support, poussez/tirez toujours à partir du support et non du four.

—

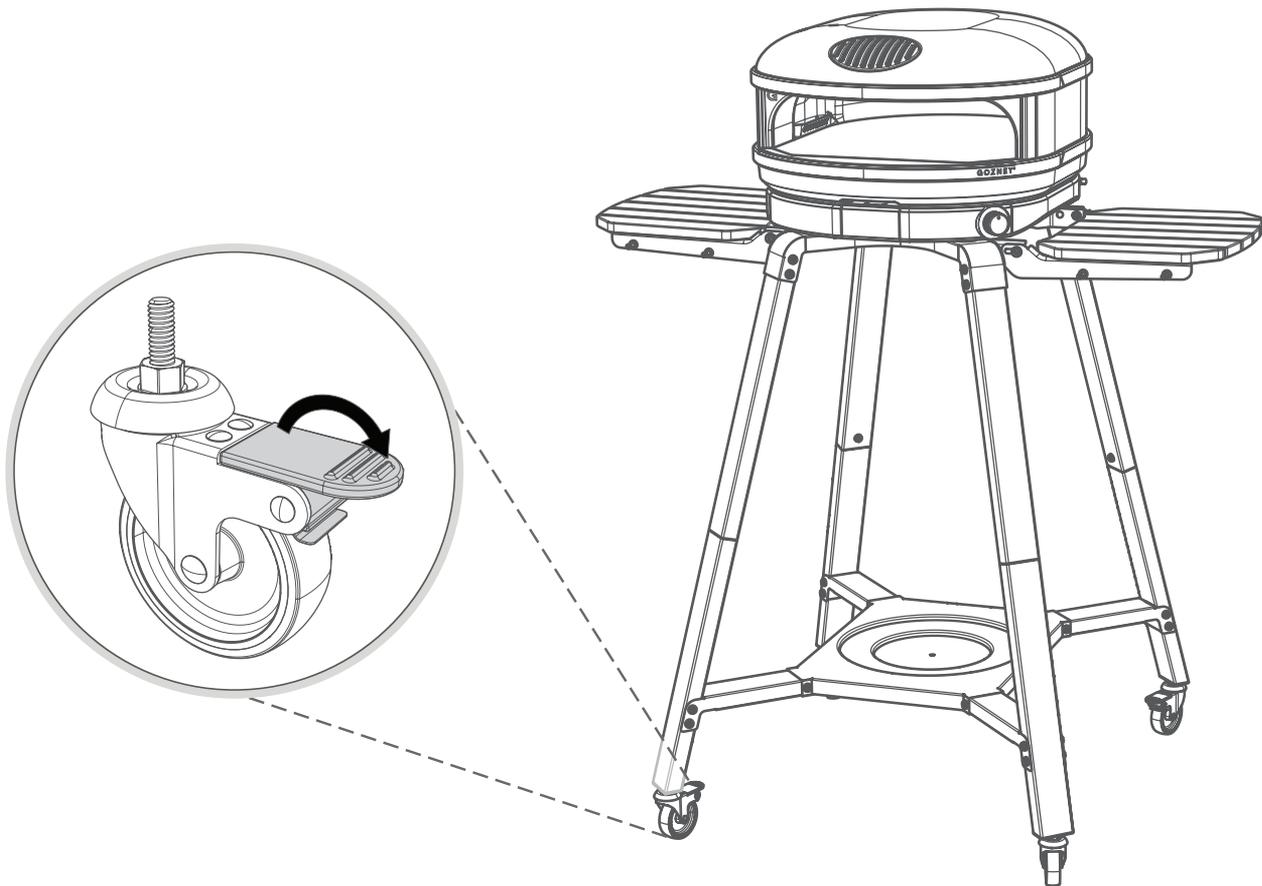

Enlevez tout ce qui n'est pas fixé du support ainsi que ses étagères avant de le déplacer.

Le fait de poser des objets chauds provenant du four sur les étagères peut les endommager. Utilisez les protections appropriées pour éviter tout dommage.

L'exposition du bois à la lumière directe du soleil et à la pluie pendant des durées prolongées peut détériorer les couches de protection. Voici les étapes à suivre afin d'éviter cela :

1. Rangez l'unité à l'abri de la lumière du soleil lorsque vous ne l'utilisez pas.
2. Essuyez le bois à l'aide d'un chiffon sec après une exposition à l'humidité.
3. Appliquez une huile de protection pour mobilier extérieur toutes les 8 semaines.

Four à gaz

Toujours débrancher le four de l'alimentation de gaz avant de déplacer le four.

—
Les roulettes doivent toujours être bloquées lorsque le four est raccordé à l'alimentation de gaz, même si le four n'est pas utilisé.

Veillez à bien utiliser le raccord gaz Gozney fourni ou un raccord respectant les normes pour appareils à gaz mobiles (ANSI Z21.69 / CSA 6.16) et un dispositif de déconnexion rapide respectant les normes en vigueur (ANSI Z21.41 / CSA 6.9).

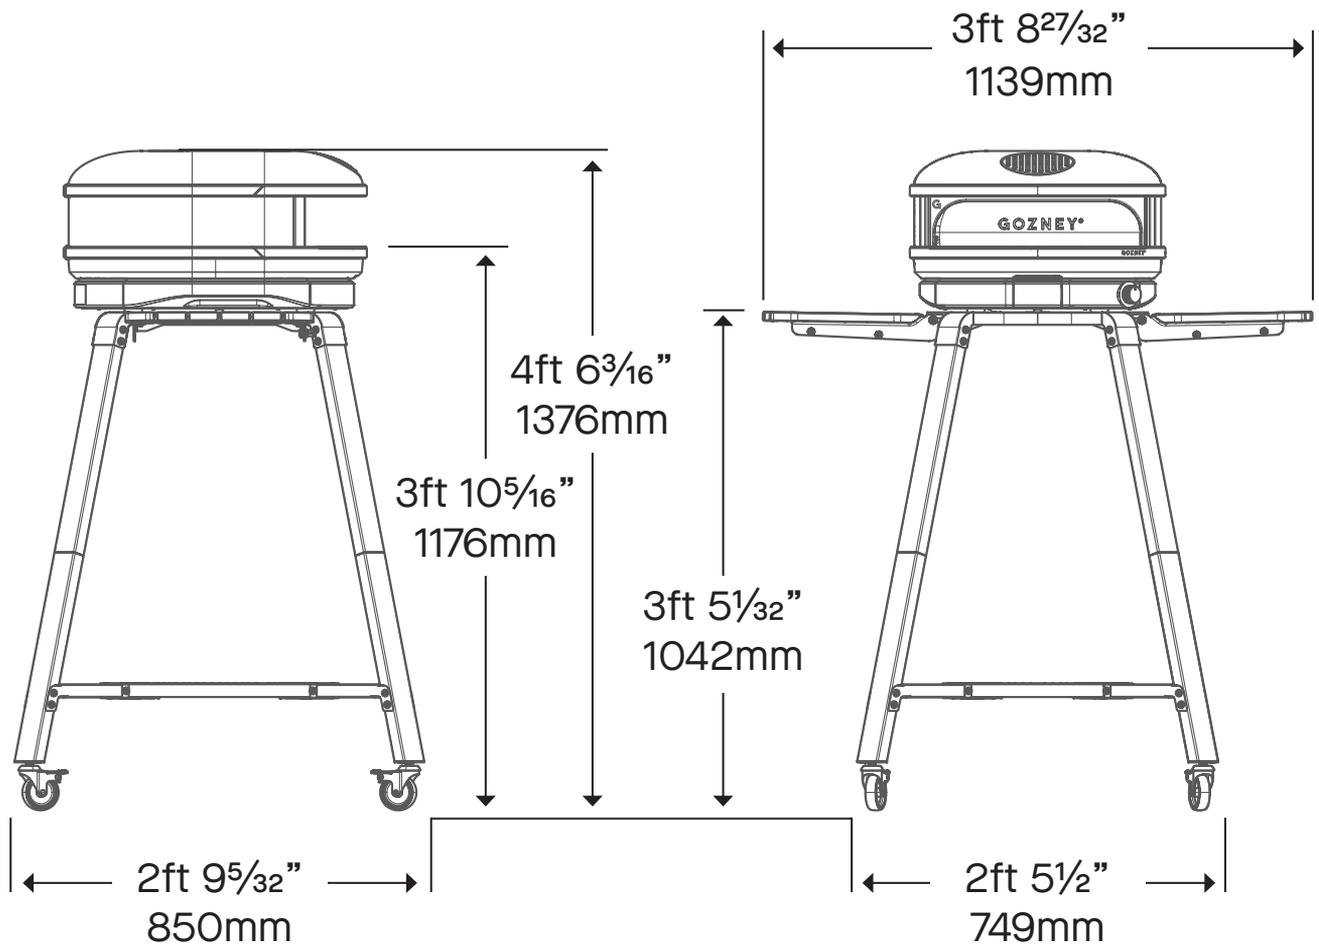

Le raccord de gaz et le dispositif de déconnexion rapide ou son tuyau associé ne doivent jamais être utilisés pour limiter le mouvement de l'appareil.

Cette partie détaille le processus de montage du support et l'installation appropriée du Dôme.

Montage et Installation

Manuel de montage

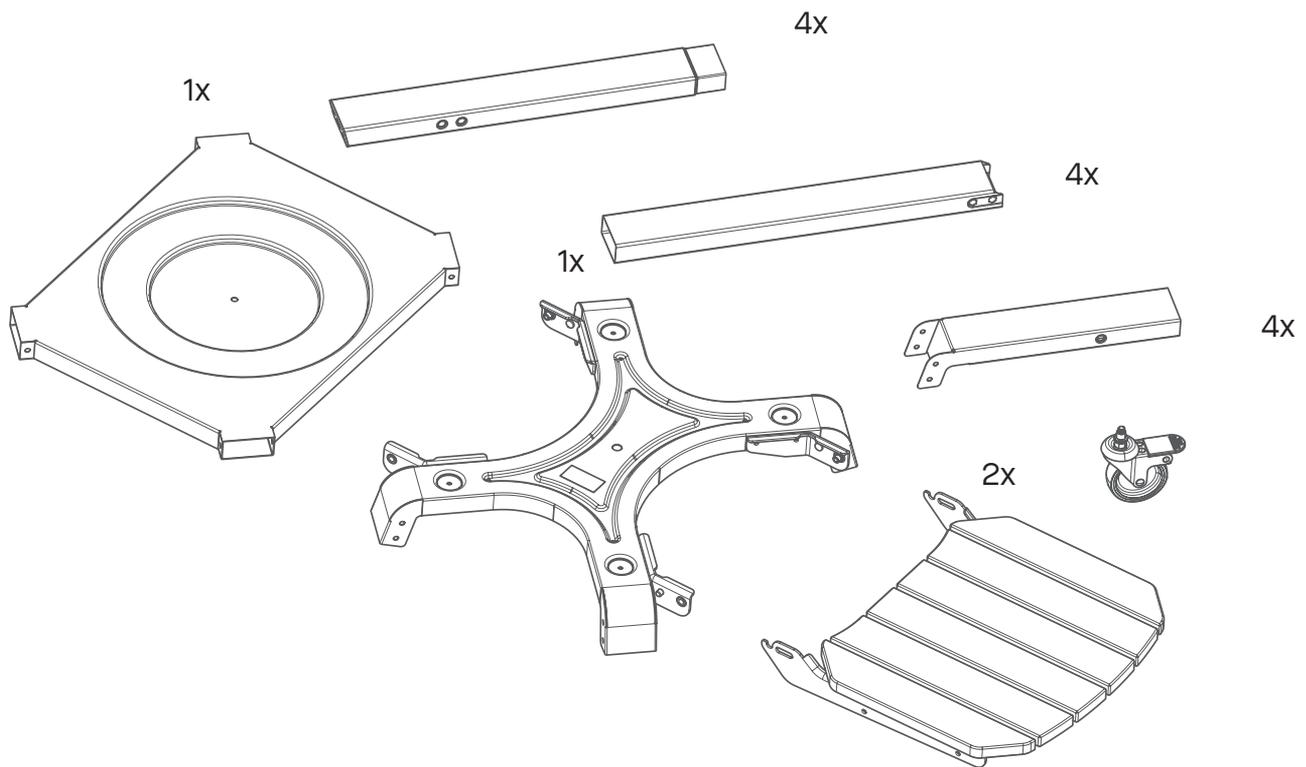

ZONE DE MONTAGE

Montez le support en face de la zone où vous prévoyez de positionner le Dôme.

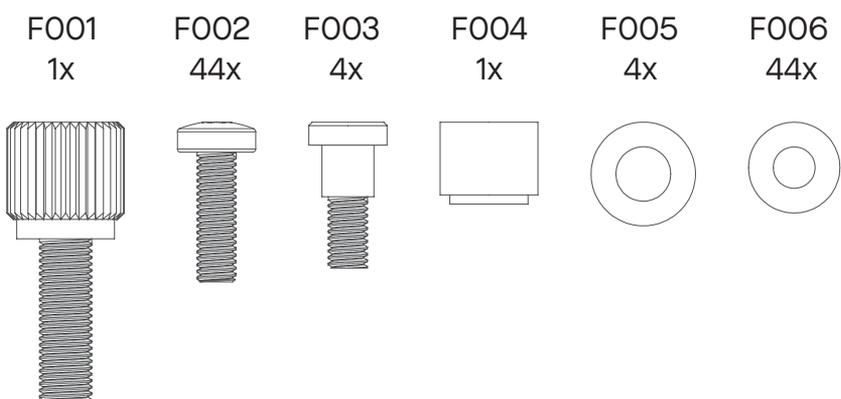

Assurez-vous que le sol soit bien stable, à niveau et capable de supporter le poids du four.

Ne placez aucune des pièces sur la surface abrasive et évitez d'endommager la peinture des pièces métalliques.

F003
4x

Étape 7

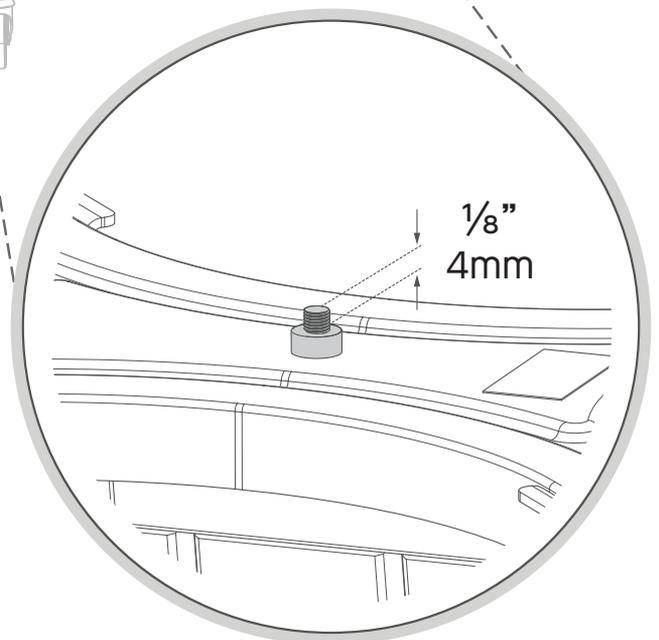

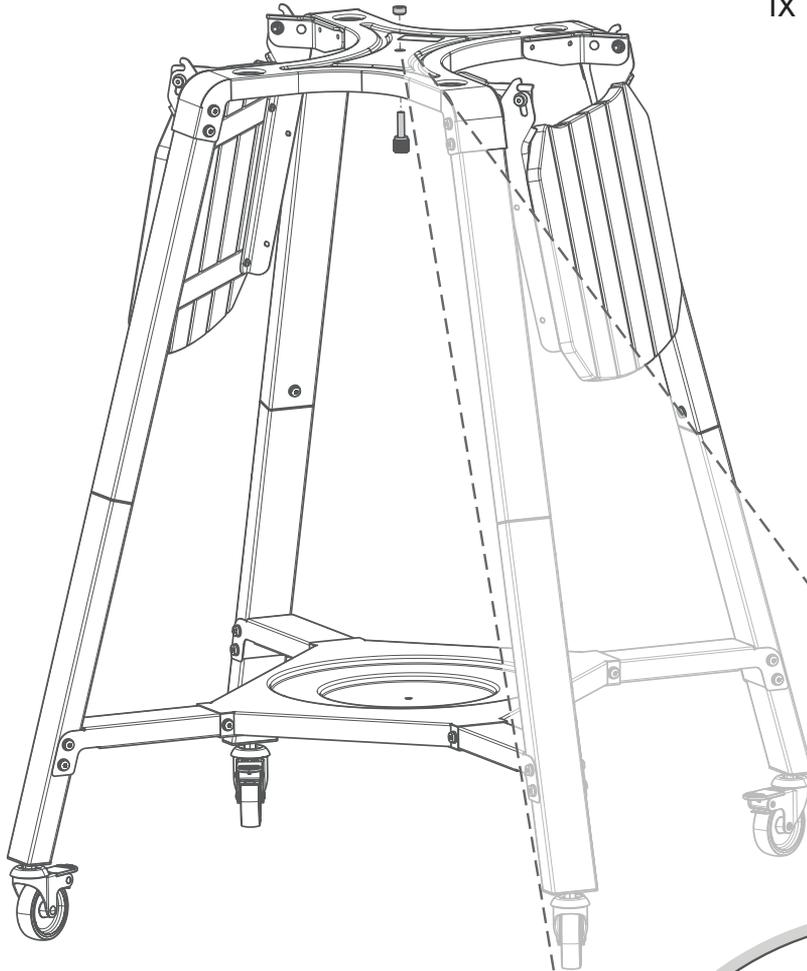

Étape 8

F004
1x

F001
1x

INSTALLATION DU DÔME

Avant d'installer le Dôme, montez les fixations F006 et F003 sur la partie supérieure du support.

—
Ne serrez pas complètement ces deux fixations, il doit rester environ $\frac{1}{8}$ " (4 mm) de filetage visible.

Étape 9

INSTALLATION DU DÔME

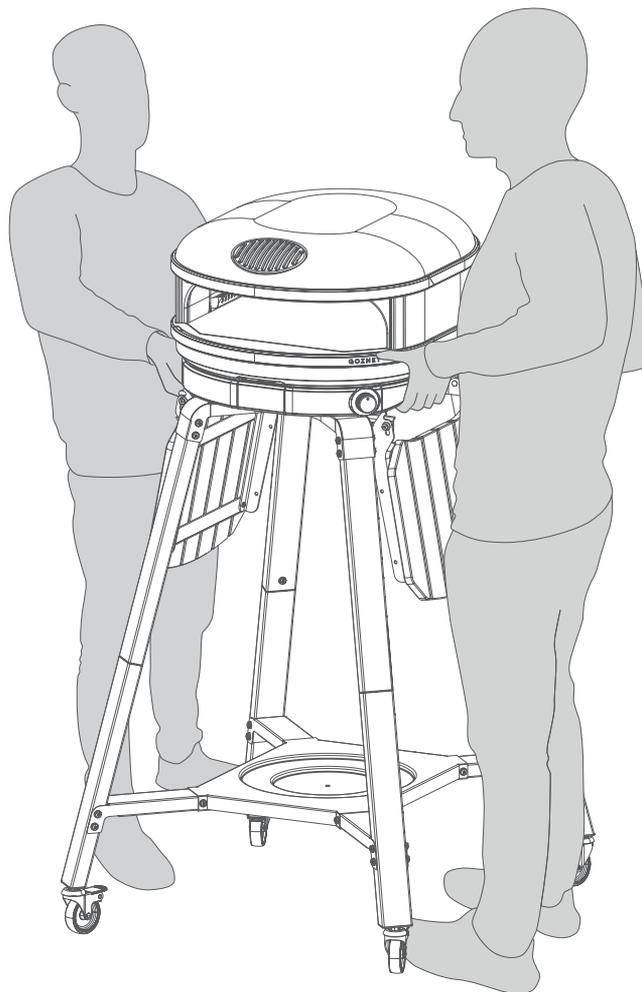

Vérifiez que les fixations F006 et F003 sont bien montées sur le support avant d'installer le four.

—
Retirez tout ce qui n'est pas fixé du four avant de le déplacer.

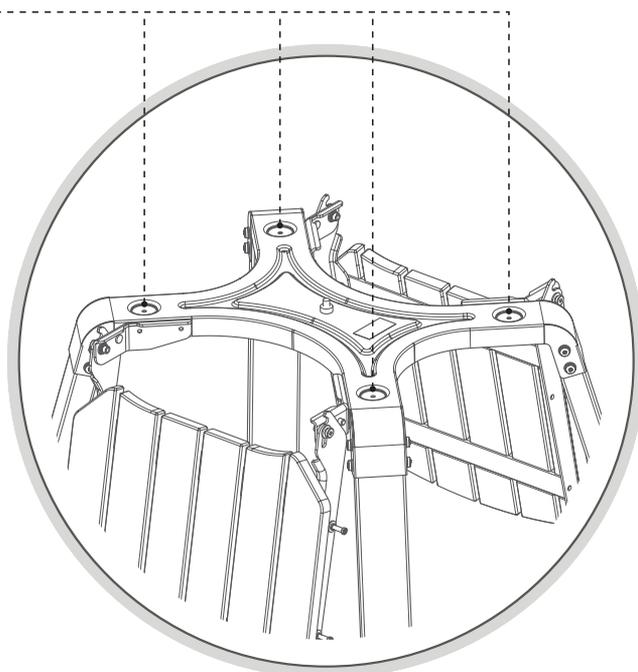

—
Deux personnes sont nécessaires pour porter le Dôme par les extrémités arrondies du four comme indiqué sur l'illustration.

—
Ne soulevez jamais le Dôme tout seul.

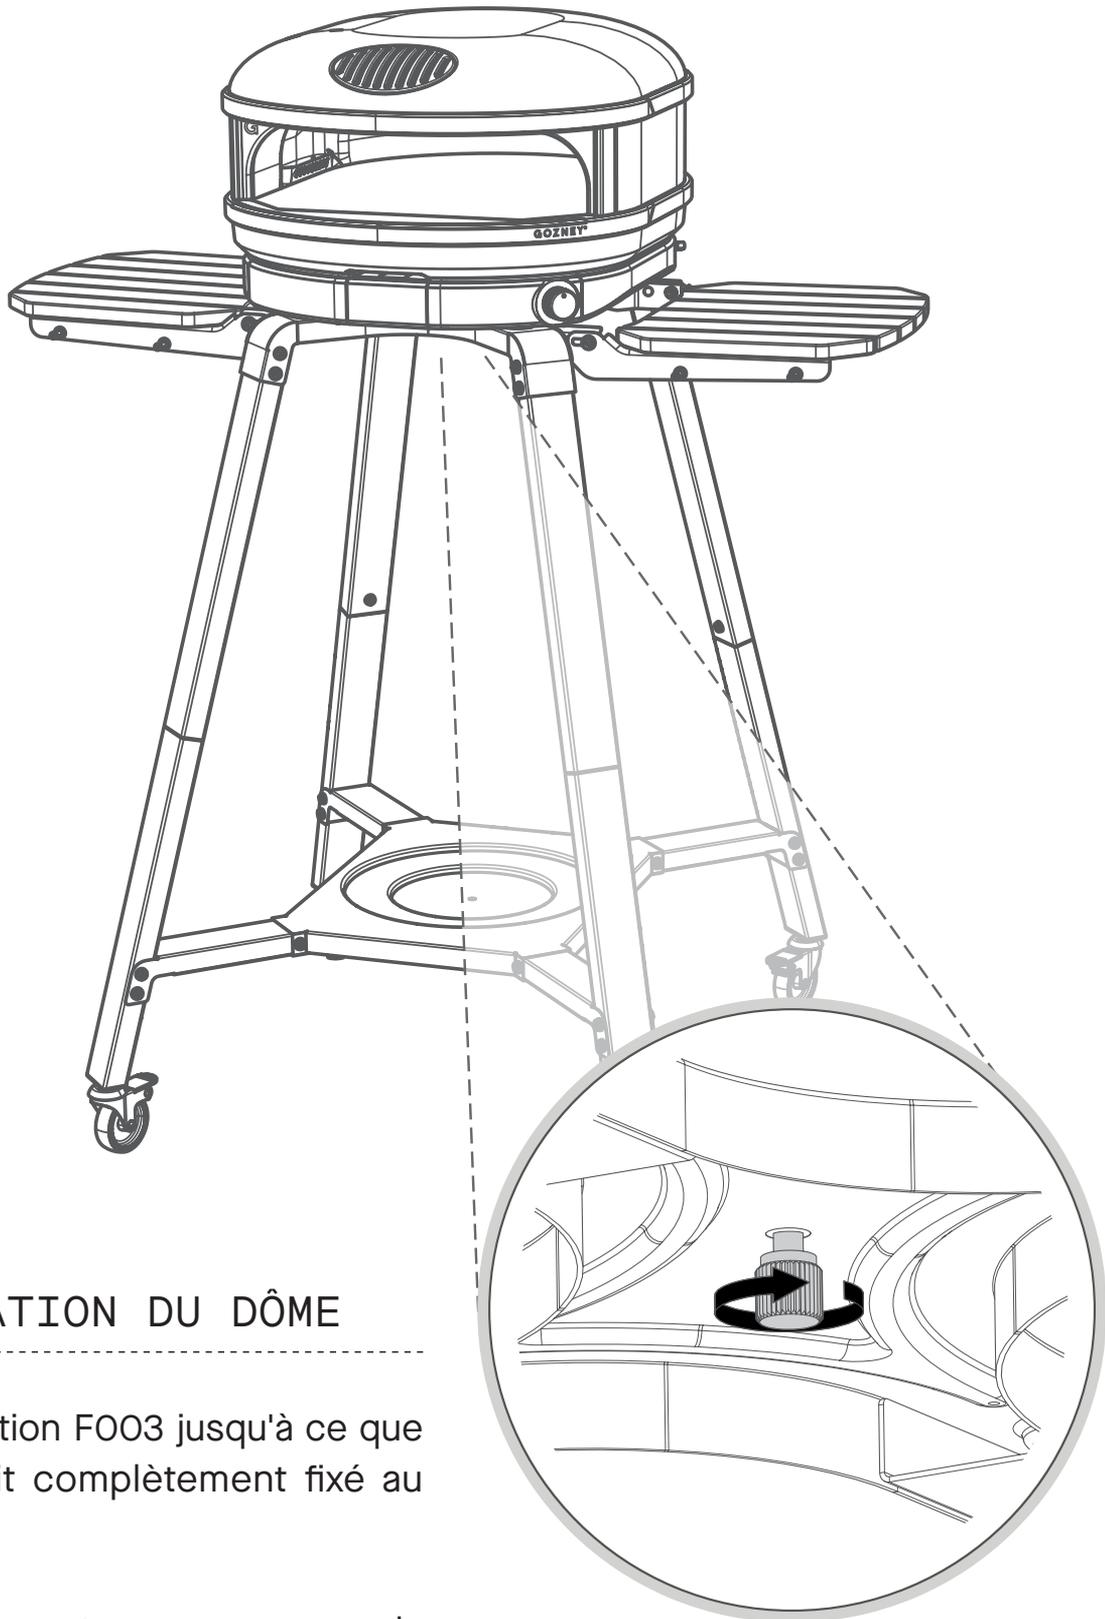

—
N'utilisez pas la bouche du four comme point de levage.

Alignez les pieds du Dôme avec les fentes mises en évidence. Vérifiez que les pieds soient complètement alignés avant de le bouger.

Étape 10

INSTALLATION DU DÔME

Serrez la fixation F003 jusqu'à ce que le Dôme soit complètement fixé au support.

—

Veillez à ne pas trop serrer car cela pourrait endommager le support.

—

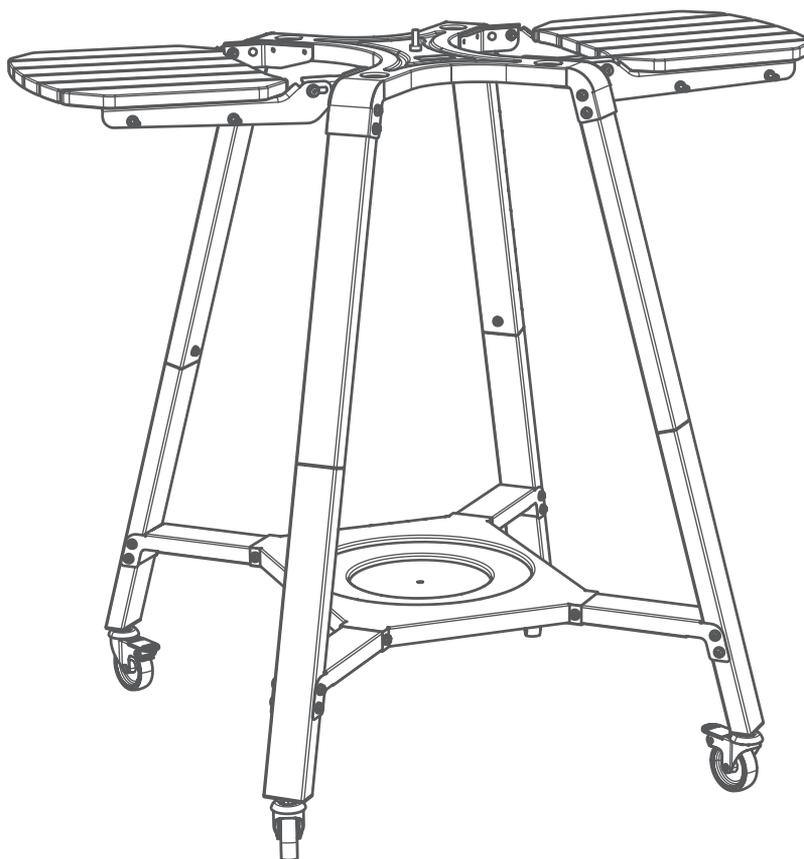

Ne jamais utiliser le Dôme sans qu'il ne soit fixé au support.

Denne delen beskriver prosessen med å bygge stativet og riktig installasjon av kuppelstativet.

Forholdsregler og advarsler

Forholdsregler og advarsler

Forsikre deg om at du har lest, forstått og fulgt advarslene og advarslene i kuppelanvisningen som følger med ovnen.

—

Alle de fire hjulene skal alltid være låst med mindre du flytter ovnen.

—

Forsøk aldri å flytte ovnen mens den fortsatt er varm, vent til den er helt avkjølt først.

—

Når du flytter ovnen på stativet, skyv/trekk alltid fra stativet og ikke ovnen.

—

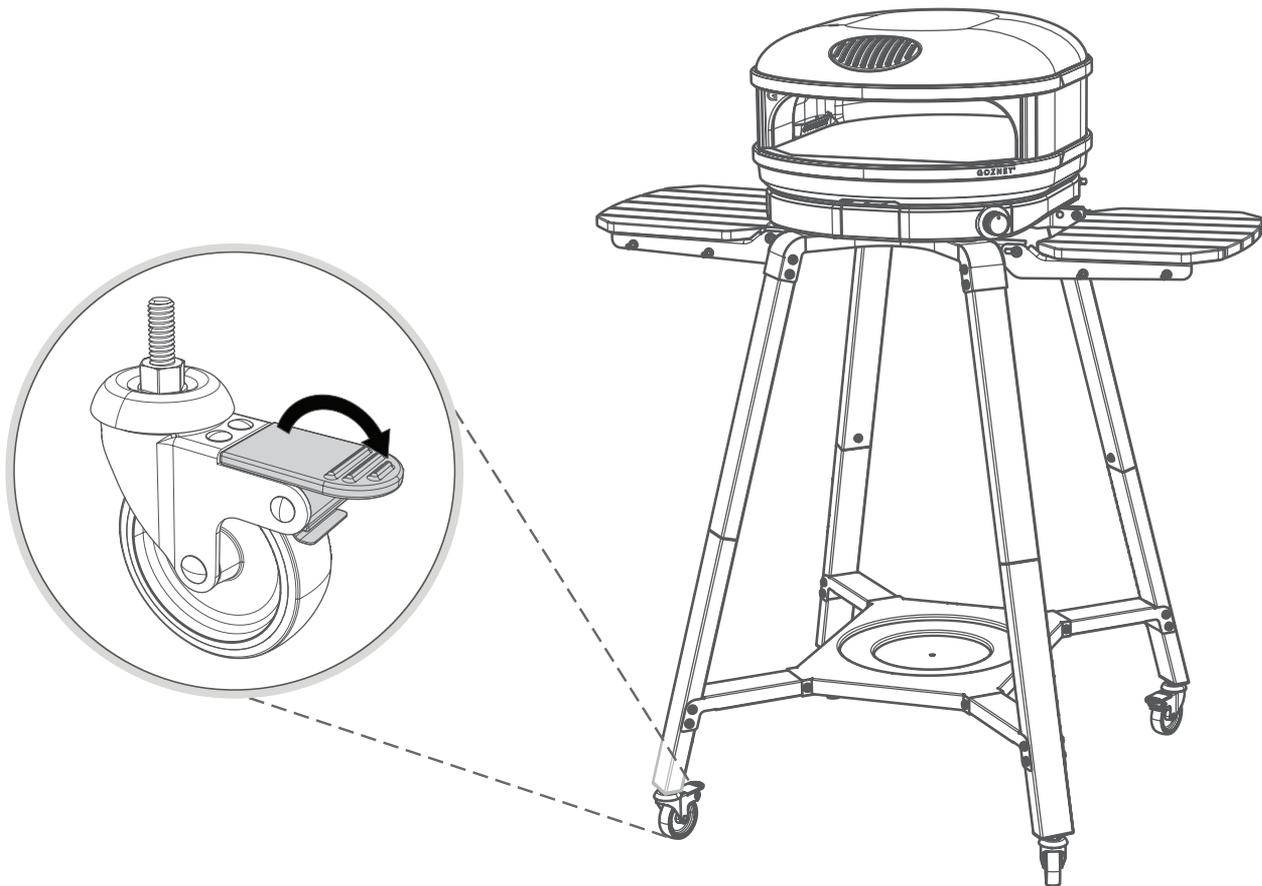

Fjern alt som er løst fra stativet og dets hyller før du flytter det.

Plassering av varme gjenstander fra ovnen på trehyllene kan skade dem. Bruk passende beskyttelse for å unngå skade.

Å utsette treverket for direkte sollys og regn i lengre perioder kan føre til at de beskyttende lagene brytes ned. Følg trinnene nedenfor for å forhindre dette:

1. Oppbevar enheten vekk fra sollys når den ikke brukes.
2. Tørk av treverket med en myk klut etter eksponering for fukt.
3. Påfør en utendørs oljebehandling hver 8. uke.

Gassovn

Koble alltid ovnen fra gasstilførselen før du flytter ovnen.

—

Hjulene skal alltid være låst når ovnen er koblet til gass, selv om ovnen ikke er i bruk.

Forsikre deg om at du bruker en Gozney-levert gasskontakt eller en som samsvarer med standarden for bevegelige gassapparater (ANSI Z21.69 / CSA 6.16), og en hurtigfrakoblingsenhet som samsvarer med de relevante standardene (ANSI Z21.41 / CSA 6.9).

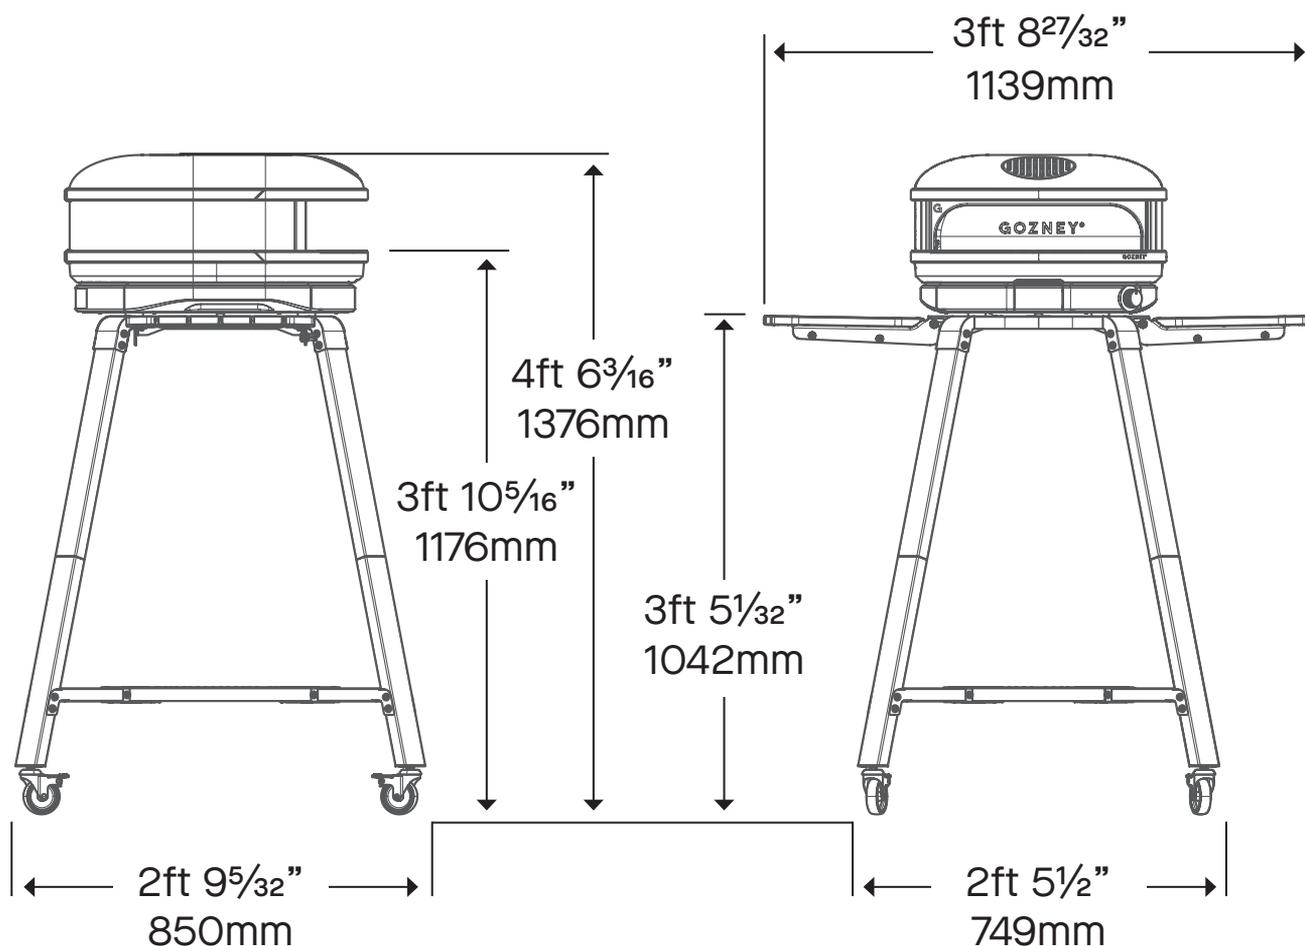

G a s s k o n t a k t e n og hurtigfrakoblingsenheten eller tilhørende rør skal aldri brukes til å begrense bevegelsen til apparatet.

Denne delen beskriver prosessen med å bygge stativet og riktig installasjon av kuppelstativet.

Bygging og installasjon

Byggeanvisning

BYGGEOMRÅDE

Bygg stativet foran området der du har tenkt å plassere kuppelen.

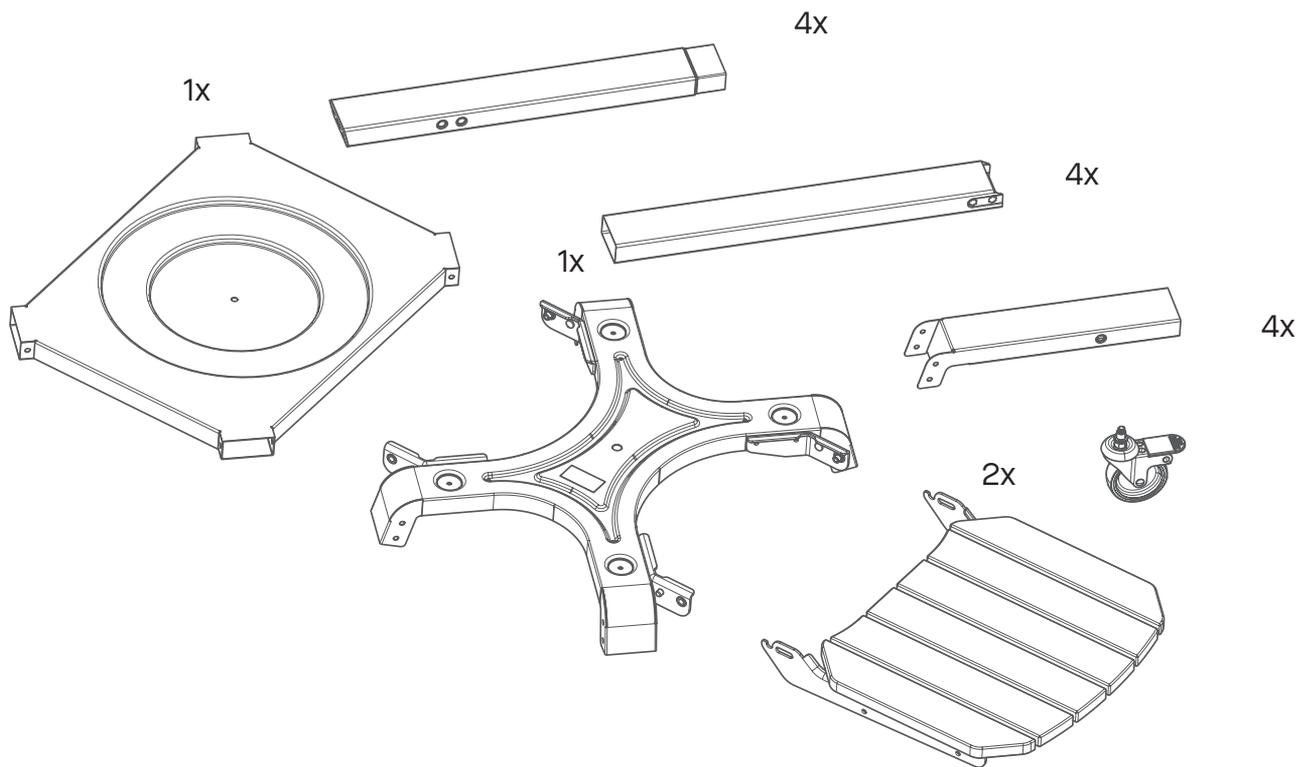

—

Sørg for at bakken er stabil og jevn og i stand til å bære ovnens vekt.

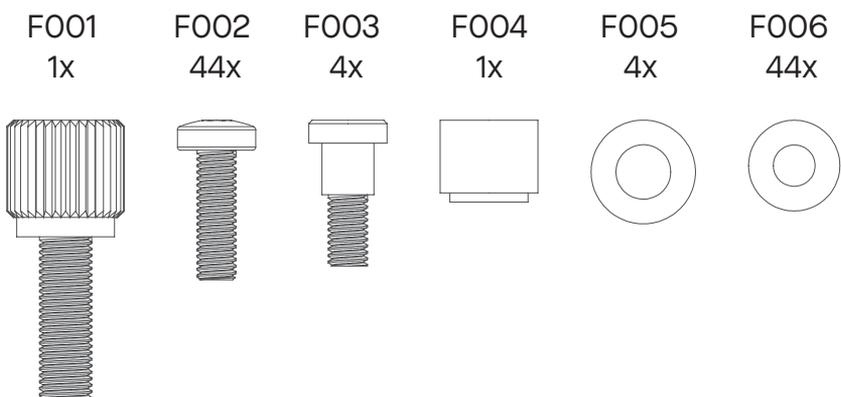

—

Ikke plasser noen av delene på en slipende overflate og unngå å skade lakken på metalledene.

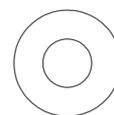

Hva er i esken

Trinn 5

STRAM BOLTER

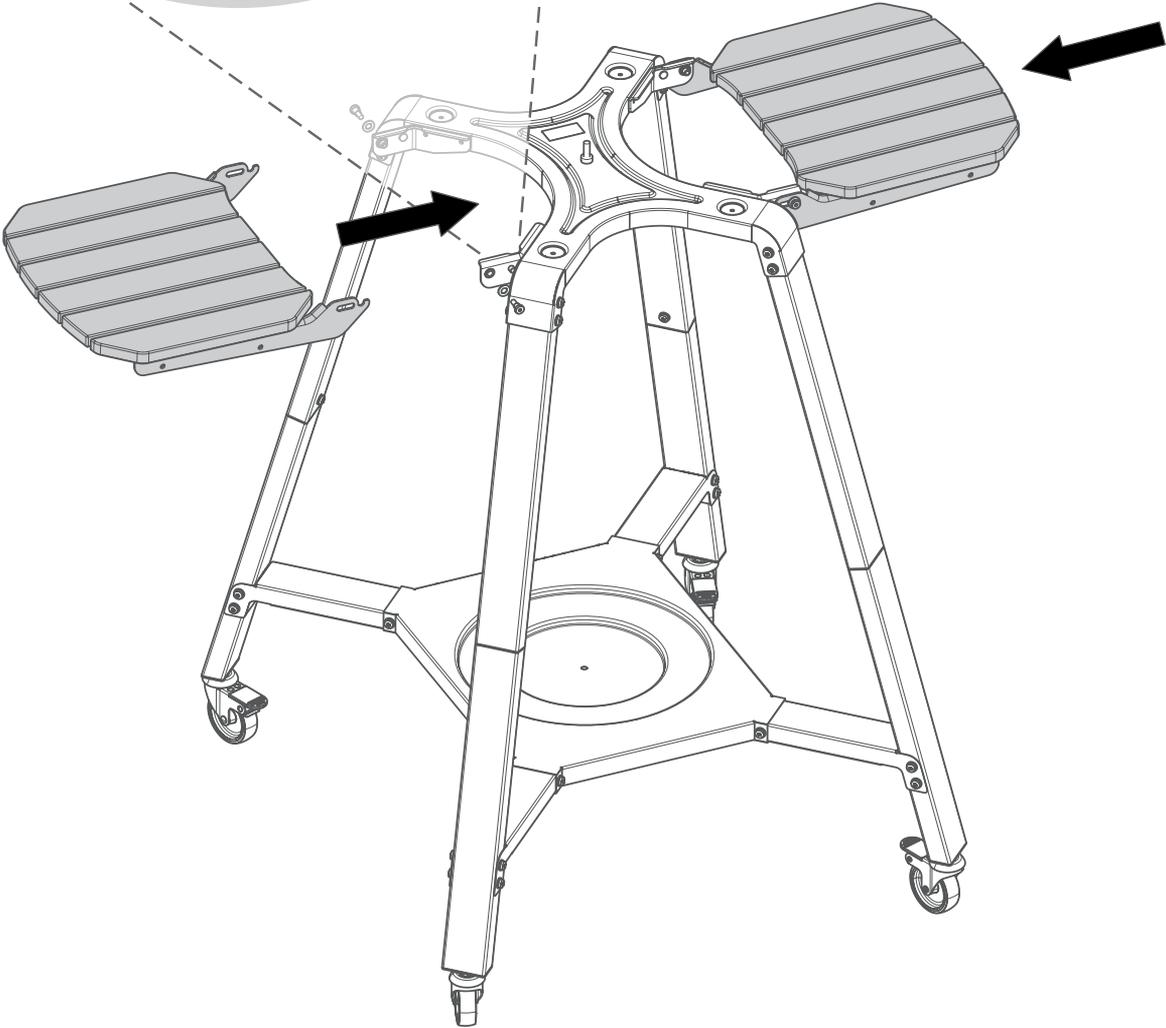

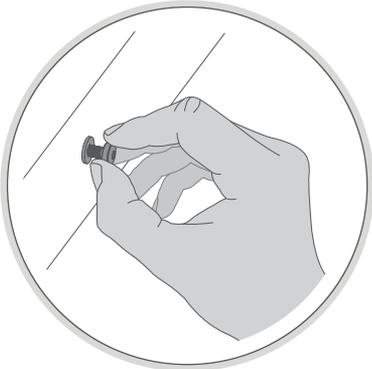

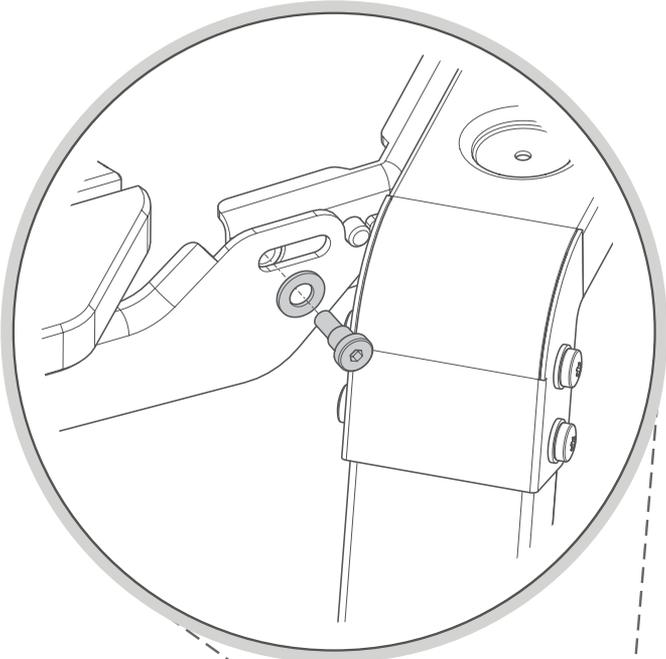

Stram til alle fester på stativet. Pass på at du ikke strammer for mye.

Trinn 6

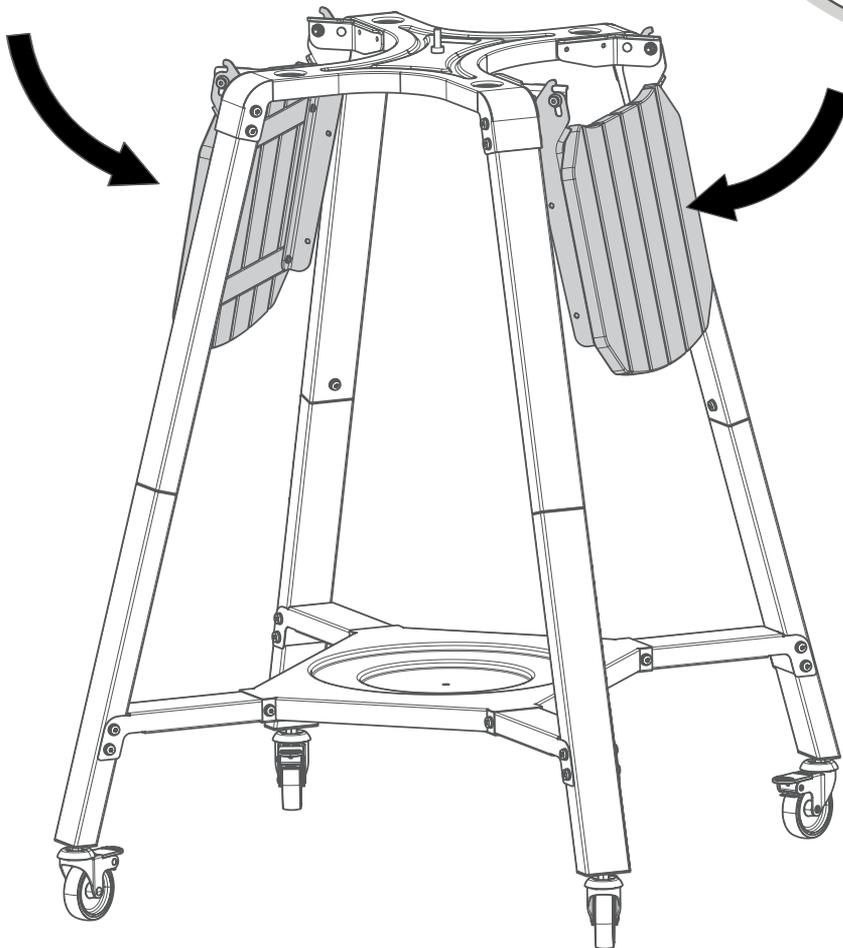

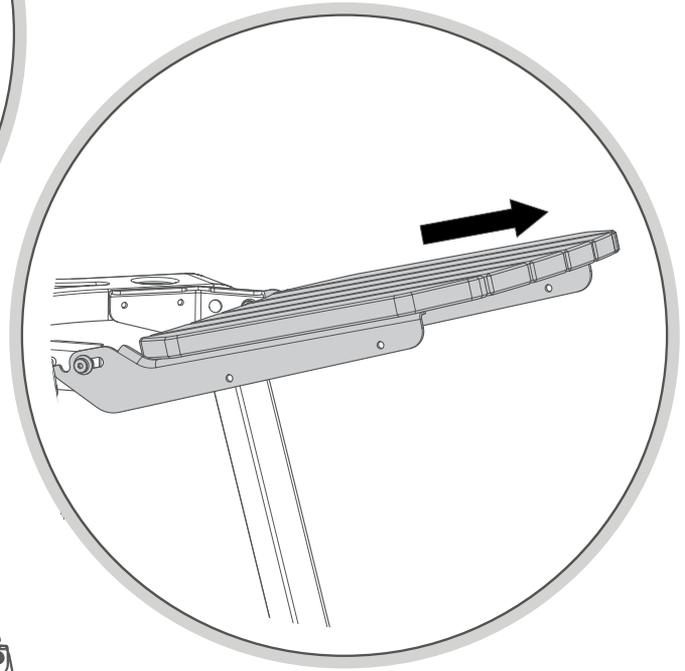

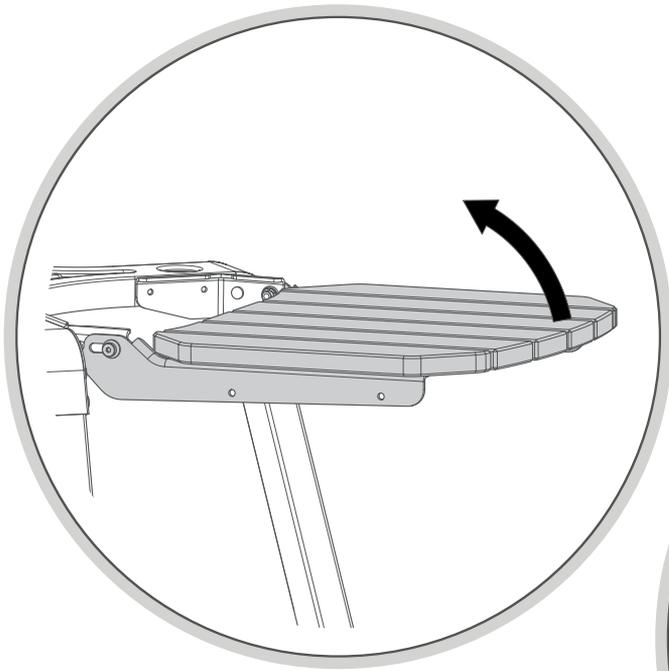

F005
4x

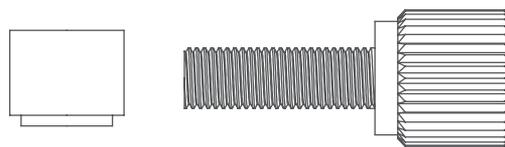

F003
4x

Trinn 7

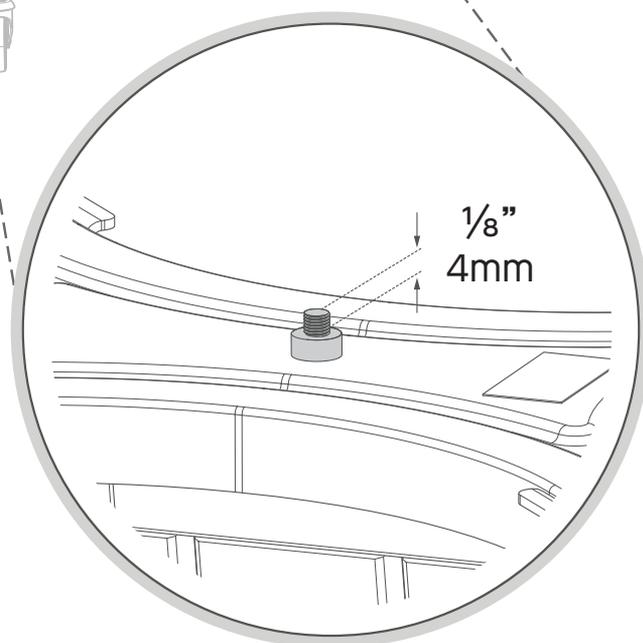

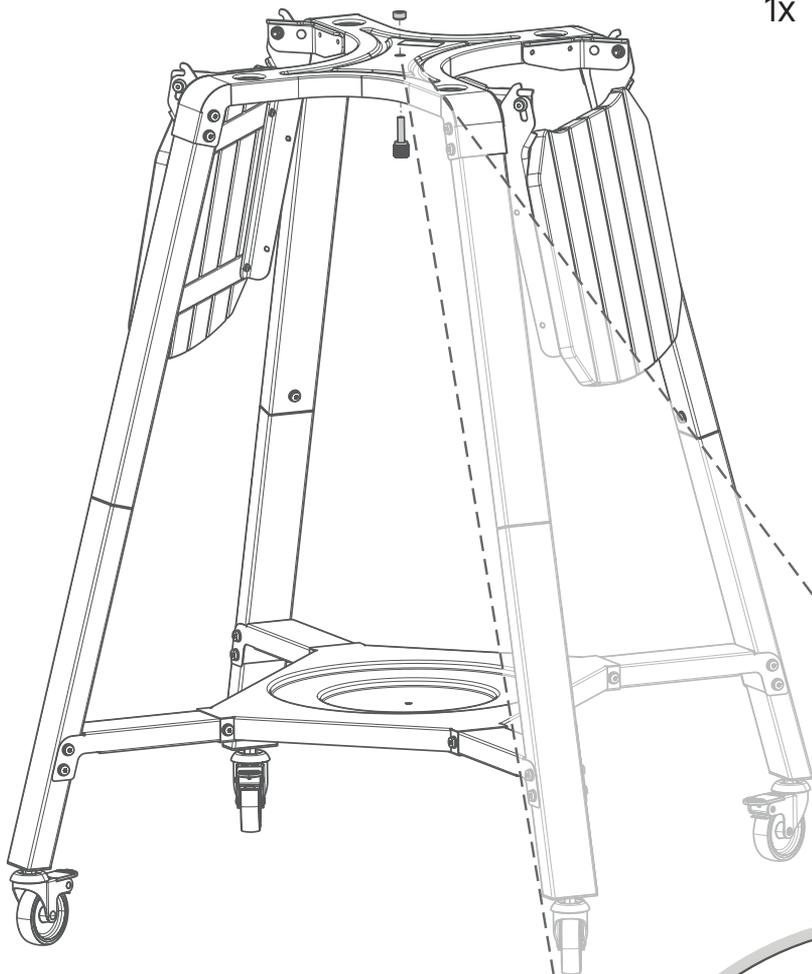

Trinn 8

F004
1x

F001
1x

INSTALLERE KUPPEL

Før du installerer kuppelen, monter festene F006 og F003 på toppen av stativet.

Ikke stram disse to festene helt. Det må være rundt $\frac{1}{8}$ " (4 mm) med gjenger synlig.

Trinn 9

INSTALLERE KUPPEL

Sørg for at feste F006 og F003 er montert i stativet før du installerer ovnen.

—

Fjern alt som er løst på ovnen før du flytter.

—

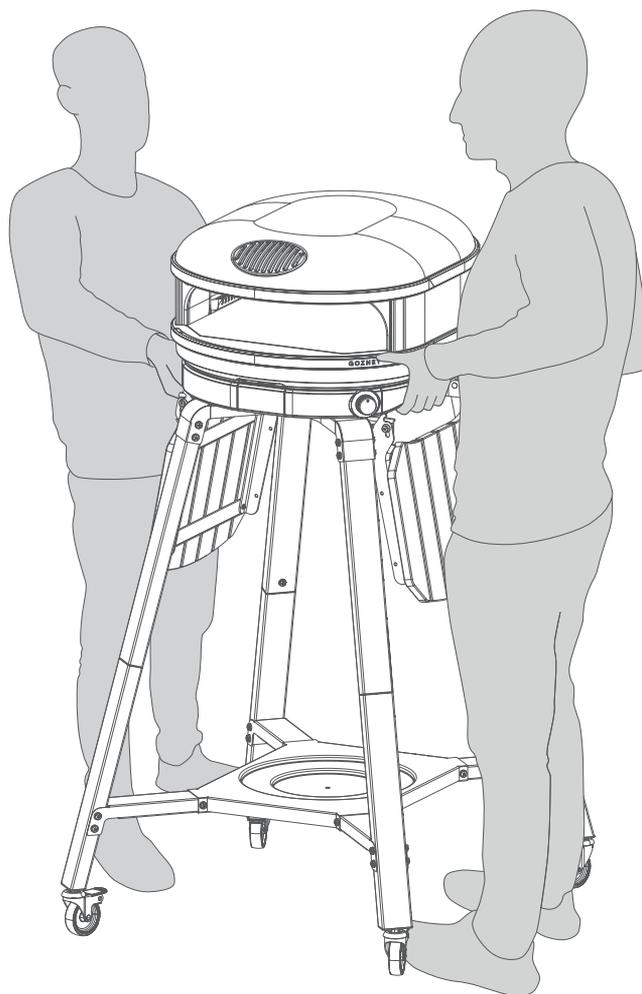

To personer bør løfte kuppelen fra de avrundede endene av ovnen som vist.

—

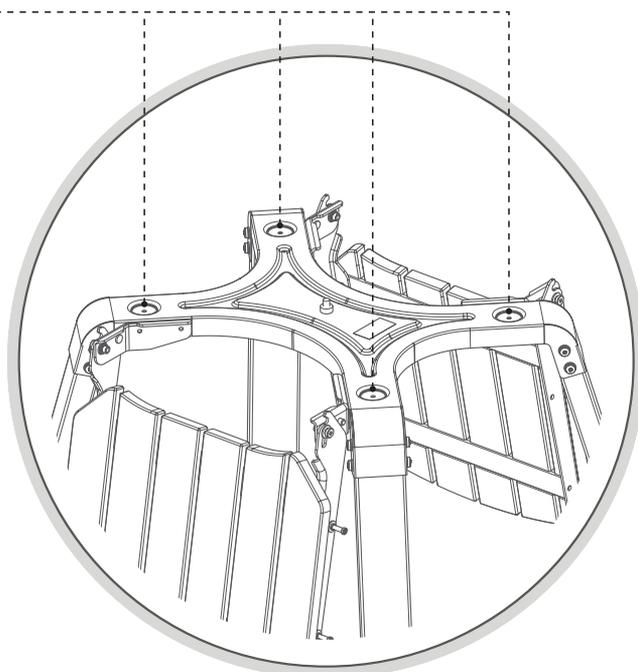

Aldri løft kuppelen på egen hånd.

—

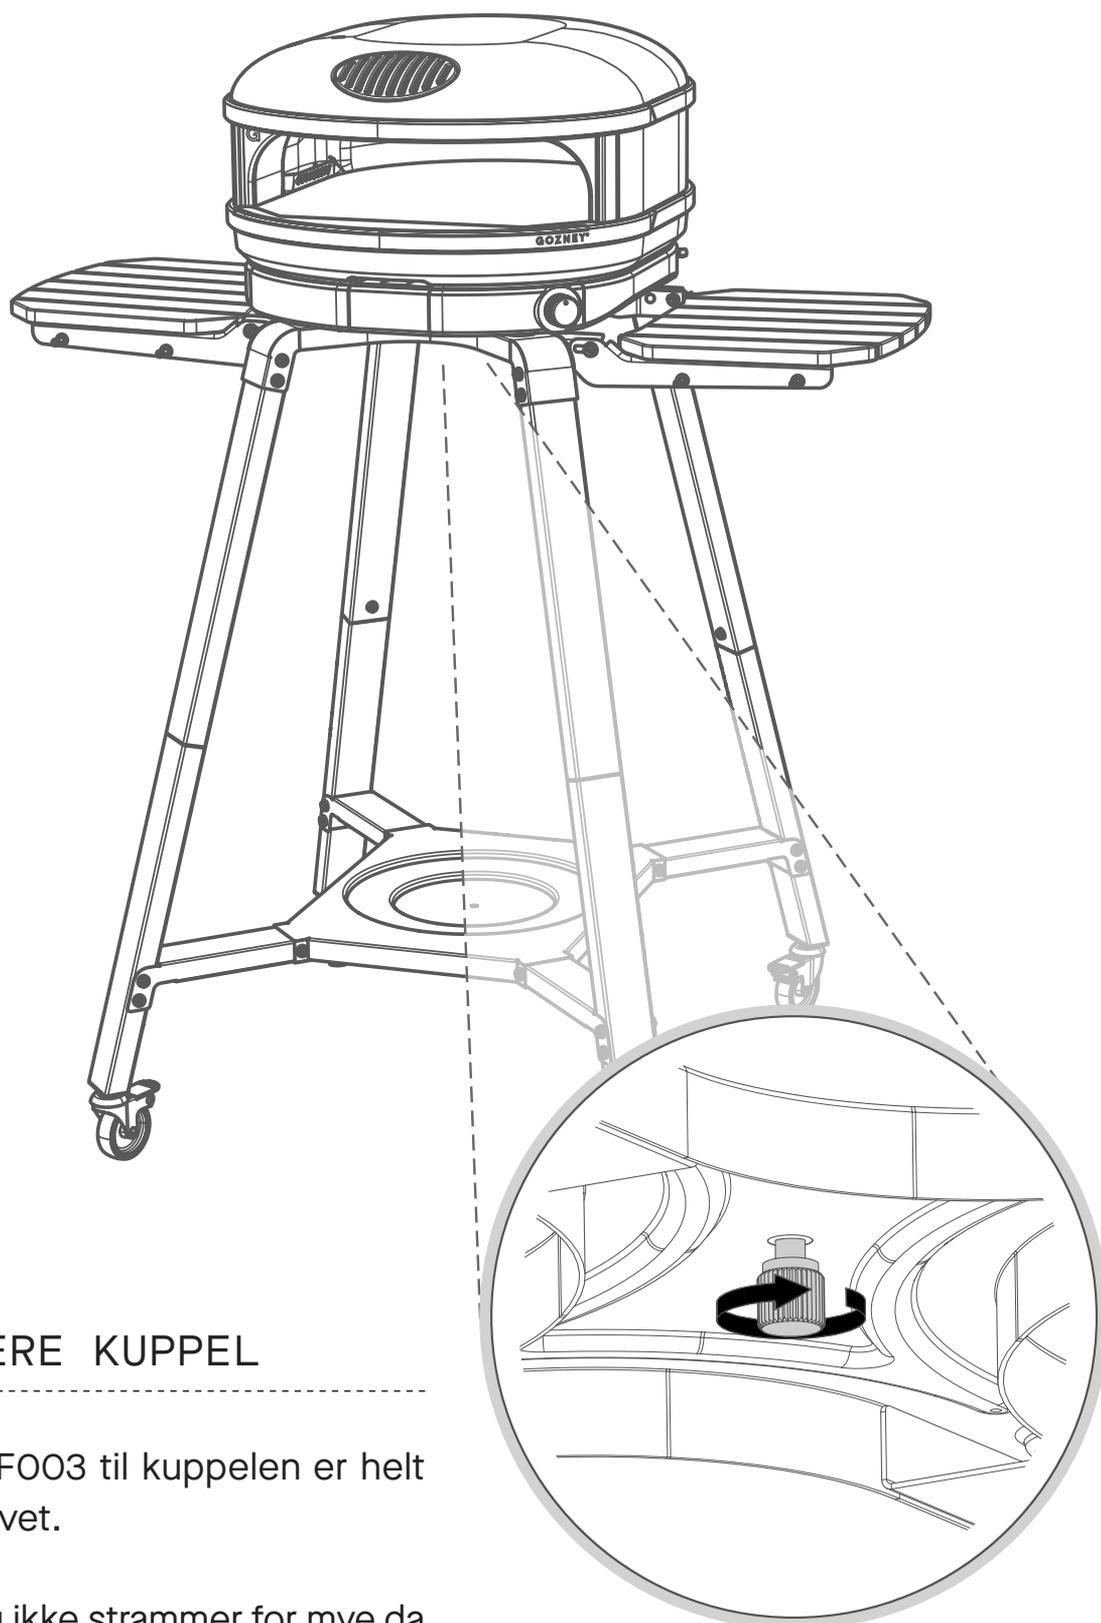

Ikke bruk ovnsåpningen som løftepunkt.

Juster kuppelens føtter med de uthevede sporene. Sørg for at føttene er helt på linje før du går videre.

Trinn 10

INSTALLERE KUPPEL

Stram feste F003 til kuppelen er helt festet til stativet.

—

Pass på at du ikke strammer for mye da det kan skade stativet.

—

Bruk aldri kuppelen uten at den er festet til stativet.
